FLUIDRA
THE PERFECT POOL EXPERIENCE

We are a leader in the global pool industry. Our portfolio includes some of the most trusted brands, including Jandy®, AstralPool®, Polaris®, Cepex®, Zodiac®, CTX Professional® and Gre®. We offer our customers an expansive array of products across both the residential and commercial pool and wellness markets, and we have a strong geographical footprint with operations in over 45 countries.

We have over 7,000 employees and the necessary resources to accelerate innovation in critical areas like energy-efficiency, robotics and the Internet of Things.

Recently, we introduced our **2020-2026 Environmental, Social and Governance (ESG) Plan**, our Responsibility Blueprint. This plan aims to integrate principles of sustainability, social fairness and responsible corporate governance into the way we conduct our business globally as well as in the local communities we operate within. We are convinced that a company with high ESG standards is a more economically sustainable company and one that is more highly valued by its customers, employees and shareholders.

To reflect our ESG focus, we have made an important change to our company mission, as well as added a new vision.

Our mission, which is what drives us every morning we come to work, is: **To create the perfect pool experience responsibly.**

And our vision, which is the motivating reason why we do what we do every day, is: **To enhance lives through innovative and sustainable solutions that transform the way people enjoy water for recreation and health**.

As part of our ambitious **Fluidra 4.0 plan**, we are looking forward with the goal to drive the evolution of the pool and wellness space. This plan puts focus on leveraging our **IT infrastructure** as a competitive advantage; advancing **digital solutions** to make owning and working on a pool easier and more enjoyable; utilizing and commercializing our **data** to generate business opportunities; and simplifying our **internal processes** to make us easier to do business with. By meeting these objectives, we will not only enhance the pool experience for our customers, but also reinforce our dynamic company culture and position our organization for future growth.

NEW PRODUCTS 2023

SENTRY LIFEGUARD CHAIR

S.R.Smith

+ **Outdoor furniture style and appeal. Constructed from HDPE for strength and low maintenance. Marine grade, 316 stainless steel hardware. Textured treads for slip resistant surface.**

FMR REGENERATIVE MEDIA FILTERS

ASTRALPOOL

+ **The regenerative media (perlite) filters are designed for efficient water purification in pools for collective use. The water filtration system uses perlite as a regenerating filtration media, capable of filtering water down to 1 micron and with low water, energy and chemical requirements compared to traditional flint and glass filters.**

ACQUA DOS DOSING PUMPS

ASTRALPOOL

+ **With only 3 sizes Acqua Dos dosing pumps cover a wide range of performances, having a flow rate range from 4 to 110 l/h and a back pressure up to 16 bar.**

LUMIPLUS ESSENTIAL RANGE

ASTRALPOOL

MADE IN EUROPE

+ **A complete range of PAR56 and Flat LEDs range to bring light to the pool.**

UNIK CONNECTION BOX

ASTRALPOOL

PROFESSIONAL ADVICE RECOMMENDED

+ **Connection box designed to be integrated in the pool surrounding, with a flexible installation option and a easy manipulation from the inside.**

VELOCITY ADVANTAGE STARTING BLOCK

S.R.Smith

+ **Velocity Advantage starting blocks feature strong fiberglass footboards with track start wedge on an HDPE composite base, particularly suitable for bulkheads.**

NEW PRODUCTS 2023

BACKSTROKE START TRAINING DEVICE

SR Smith

+ **Anti-slip backstroke ledge with raised diamond pattern.
Two 5-foot polyester straps with stainless steel cam buckle
to secure and adjust height.
Works with a wide variety of starting platforms.**

See page 368

BACKSTROKE START SYSTEM

SR Smith

+ **Designed to help make backstroke starts faster and reduce
the chance for slipping, the Backstroke Start System
provides the option to easily add this capability to virtually
any pool deck or starting platform configuration...**

See page 369

HOTEL SPA

ASTRALPOOL

+ **New model that fills the hot tub with water automatically.
It fills the hot tub with new water in only 45 minutes,
making it the perfect and most practical option for hotels.**

See page 479

PROFESSIONAL ADVICE RECOMMENDED

DESTINATION LOUNGER

SR Smith

+ **The Destination Lounger lets you relax and enjoy the pool
without a splash. Elegant design and sturdy construction
combine to give pool owners the opportunity to upgrade
their sun shelf space with ease.**

See page 492

RTM - MINIMUM WEIGHT MAXIMUM STRENGTH

SALT POOL FRIENDLY - NaCl

SWING Z DANCER JET

ASTRALPOOL

+ **The Swing Dancer jet effect provides a show of light,
color and graceful movements that express feelings and
emotions transmitted through the magical combination
of water and light, all of which creates the impression
of a ballet staged on the water. In combination with the
FUN nozzle and the rotation of the Z axis, we can create
incredible water effects.**

See page 559

MESH CURTAIN

ASTRALPOOL

+ **This mesh waterfall creates a continuous effect of falling
water, producing a soft sound of calm and tranquility. It
generates a pleasant and attractive hypnotic effect that
recreates small waves of water.**

See page 562

FLUIDRA

Creating
A MORE SUSTAINABLE POOL.

Fluidra is committed to developing more sustainable products and facilitate maintenance. We have selected a range of equipment to help you create a more sustainable pool experience.

Water Conservation   **Energy Efficient**   **Chemical Reduction**   **Carbon Reduction**   **Circular**

A more sustainable pool is one that incorporates key features and equipment to achieve a lower environmental impact, by significantly reducing the consumption of resources (water, energy and consumables), and being viable in terms of maintenance cost and return on the initial investment. From VS Pumps that use less energy to water sanitizers that consume less chemicals to automatic covers that prevent water evaporation and reduce thermal loss, Fluidra offers a wide range of solutions that contribute to a more sustainable pool.

ASTRALPOOL   ZODIAC

WHAT IS A GREEN CONSTRUCTION AND HOW DOES FLUIDRA CONTRIBUTE?

A green construction is a building that in its design, construction or operation reduces or eliminates negative impacts, and that can have positive impacts on our climate and natural environment. Green buildings preserve precious natural resources and improve our quality of life.

There are a number of features that can make a building green. These include:

- Efficient use of energy, water and other resources
- Use of renewable energy, such as solar energy
- Pollution and waste reduction, and the re-use and recycling of materials
- Good indoor environmental air quality
- Use of materials that are non-toxic, ethical and sustainable
- Consideration of the environment in design, construction and operation
- Consideration of the quality of life of occupants in design, construction and operation
- A design that adapts to a changing environment

Green building certificates and assessment initiatives are a set of rating systems and tools that are used to assess a building or a construction project's performance from a sustainability and environmental perspective.

LEED

BREEAM

LEVEL(S)

Level(s)
Building sustainability performance

WHAT IS LEED?

LEED (Leadership in Energy and Environmental Design) is an ecology-oriented building certification program run under the auspices of the U.S. Green Building Council (USGBC). It is the most widely used green building rating system in the world.

LEED GREEN BUILDING LEADERSHIP

LEED provides a framework for healthy, efficient, carbon - and cost-saving green buildings. LEED certification is a globally recognized symbol of sustainability achievement and leadership.

HOW LEED WORKS

LEED-certified buildings save money, improve efficiency, lower carbon emissions and create healthier places for people. They are a critical part of addressing climate change and meeting ESG goals, enhancing resilience, and supporting more equitable communities.

To achieve LEED certification, a project earns points by adhering to prerequisites and credits that address carbon, energy, water, waste, transportation, materials, health and indoor environmental quality. Projects go through a verification and review process by GBCI and are awarded points that correspond to a level of LEED certification: Certified (40-49 points), Silver (50-59 points), Gold (60-79 points) and Platinum (80+ points).

Platinum
80+ points earned

Gold
60-79 points earned

Silver
50-59 points earned

Certified
40-49 points earned

FLUIDRA

LEED CERTIFICATION
APPLIED TO FLUIDRA PRODUCTS

Although LEED does not certify products, the correct selection and integration of a product or technology do play a role achieving the desired level of a building's certification. With this aim, Fluidra began to map its products in order to support customers in selecting right product and help earn points toward the desired LEED certification label.

WHAT IS BREEAM?

BREEAM (Building Research Establishment Environmental Assessment Method) is the world's leading science-based suite of validation and certification systems for sustainable built environment.

HOW BREEAM WORKS

Since 1990, BREEAM's third-party certified standards have helped improve asset performance at every stage, from design through construction, to use and refurbishment. Millions of buildings across the world are registered to work towards BREEAM's holistic approach to achieving ESG, health, and net zero goals. It is owned by BRE - a profit-for-purpose organization with over 100 years of building science and research background.

591,000 CERTIFICATES IN 90 COUNTRIES

With more than 591,000 certified buildings in 90 countries, BREEAM promotes a more sustainable construction that translates into greater profitability for those who build, operate and/or maintain buildings, thus reducing their impact on the environment, as well as delivering greater comfort and health for those who live, work or use these buildings.

The scheme evaluates impacts in 10 categories (Management, Health and Well-being, Energy, Transport, Water, Materials, Waste, Ecological Land Use, Pollution, Innovation) and awards a final score after applying an environmental weighting factor that takes into account the relative importance of each impact category. It covers the different phases of design, construction and use of buildings, and has evaluation and certification schemes based on the type and use of a building.

BREEAM provides solutions to deal with the following issues:

| Net zero carbon | Whole life performance | Health and social impact | Biodiversity | Circularity and resilence | Disclosures and reporting |

FLUIDRA

BREEAM CERTIFICATION APPLIED TO FLUIDRA PRODUCTS

Although BREEAM does not certify products, the correct selection and integration of a product or technology do play a role in achieving the desired level of a building's certification. With this aim, Fluidra began to map its products in order to support customers in selecting the right product and help earn points toward the desired BREEAM certification label.

WHAT IS LEVEL(S)?

Level(s) is the European framework for sustainable buildings. It provides a common language for assessing and reporting on the sustainability performance of buildings. It is a simple entry point for applying circular economy principles in our built environment.

LEVEL(S) FRAMEWORK

Level(s) offers an extensively tested system for measuring and supporting improvements, from design to end of life. It can be applied to residential buildings or office LEED frameworks. It is a globally recognized symbol of sustainability achievement and leadership.

HOW LEVEL(S) WORKS

Level(s) uses core sustainability indicators to measure carbon, materials, water, health, comfort and climate change impacts throughout a building's full life cycle. It is a flexible solution for identifying sustainability hotspots and for future-proofing your project or portfolio. By using Level(s) you are contributing to EU policy goals to strengthen the sustainability of Europe's buildings, which are responsible for:

· 1/2 of all extracted materials

· 1/2 of total energy consumption

· 1/3 of water consumption

· 1/3 of waste generation.

Level(s) is open source and freely available to all.

Carbon emissions   Materials   Water use   Health

FLUIDRA

LEVEL(S) FRAMEWORK APPLIED TO FLUIDRA PRODUCTS

Although LEVEL (S) does not certify products, the correct selection and integration of a product or technology do play a role in achieving the desired level of a building's certification. With this aim, Fluidra began to map its products in order to support customers in selecting the right product and help earn points toward the desired LEVEL(S) framework label.

OUR BUSINESS MODEL

+ Our extensive experience in the development of innovative products and services with prestigious brands is rooted in a comprehensive and efficient business model that adapts to our different regions and markets.

+ Fluidra is a leader in the aquatic facilities sector. We have a clear mission: to create the perfect pool & wellness experience responsibly.

DESIGN

Design phases:

CONSULTANCY   **CONCEPT DESIGN**   **DEVELOPED DESIGN**   **DETAILED DESIGN**
We have a team of experts with extensive experience in the conception and design of aquatic projects working hand in hand with our clients to imagine your project together right from the start. We use some of the most advanced design tools and technologies throughout this process, including CFD (Computational Fluid Dynamics), Fluidra Live Virtual Reality (VR), and BIM (Building Information Modelling).

PROJECT MANAGEMENT

Project management is the process of planning, managing and leading a team's work and resources in order to achieve shared goals and successfully meet the project's objectives.

Fluidra has a team of on-site project managers specialized in top-level aquatic projects. They are involved from the beginning of the design phase until the delivery of the project to ensure that work is executed correctly, keeping to the schedule and in line with the client's wishes.

TIME · QUALITY · COST

R&D+I

Research, Development and Innovation (R+D+i) is a fundamental part of Fluidra's DNA and a pillar of the company's culture and growth. It has more than 1,400 patents worldwide.

We focus the innovation in the following goal areas:

ENERGY EFFICENCY   **SUSTAINABILITY**   **AUTOMATION**   **IOT (Internet of Things)**

Smart Commercial Pools

Connectivity for automation and monitoring all types of commercial pools

24/7 Water Quality

Water quality controlled and monitored thanks to the pool equipments synchronized all together in a smart way. Alarm system for real-time corrective maintenance.

Energy Savings

With a combination of connected products and data assisted preventative maintenance actions to reach optimum energy efficiency.

Smart Pool Assistants
for **all type** of pools

Control, diagnose and manage your pool
through the fluidraconnect.com platform
Through the Connect Box from your Connect & Go
you will be able to control all types of products, compatible NN
as well as the standard ones.

Filtration and recirculation
Set-up and control of pumps for energy-efficient pro-grams and optimum filter cleanliness status.

Water treatment
Integral water treatment strategy between all the pool systems. Recording all the measures as per local legislation requirements.

Lighting

Synchronization with other equipments to generate smart ambient.

Surround & Garden Equipment

Control all the pool and garden acces-sories easily: Covers, fountains, IP Cams, even irrigation systems.

Heating, Cooling and Dehumidification

Smart heating strategy for energy optimization together with the filtration and the water treatment equipment.

Control the pools under your supervision
from anyplace, whenever you want with our pool assistants
platform Fluidra Connect.

www.fluidraconnect.com
FLUIDRA CONNECT AUTOMATION
AND NN PRODUCTS for Commercial Pools

Fluidra Connect is a smart automation solution that allows both users and pool professionals to control pools remotely.

THE FUTURE IS HERE

Different levels of remote control are offered depending on user profile:

▪ **End user:**
  - User friendly NN app to remotely monitor and control the pool

▪ **Pool professional:**
  - Intuitive and versatile NN PRO app to set up each pool and allows to monitor all installed pool sites.
  - Advanced remote control of all installed pool sites using the dedicated pool professional website www.fluidraconnect.com.

All product platforms below are NN compatible to allow a smart control & exchange with Fluidra Connect and associated smartphone apps and website.
User(s) can see more operating data and be able to access to more settings compared to standard products.

+ Convenience & easy installation

+ A range of Connect & Go power center cabinets is offered to suit most commercial pools configurations.

+ Connect & Go Commercial power center cabinets contain all electrical protections and switches to manage pool equipment. Everything is pre-wired to ease installation process so it is the perfect solution for new pools, while also being adapted to retrofit situation (simply replace the whole cabinet with Connect & Go Commercial).

+ Fluidra Connect is a smart solution that enables end users and pool dealers to control a pool remotely. This makes it possible for pool dealers to check out, manage and control all the pools they have installed from a PC.

CONTROL PUMP CABINET

ASTRALPOOL

The Connect & Go VS pre-wired cabinet is a Plug & Play solution Play conceived as the control center of the pool allowing to easily vary the speed of the filtration pump.

- Power range from 3HP to 10HP.
- Pump control modes:
  - Manual (with button switch).
  - Automatic (Automation and programming times and speed through Fluidra Connect).
- Superimmunized residual current circuit breaker.
- Forced ventilation system.

EQUIPOTENTIAL ANCHOR

AstralPOOL

The aim of this accessory for ladders is to solve the problem of not having the possibility to connect ground earth cable to ladders that do not have an anchoring on the pool beach.

It is mandatory by norms to connect metallic ladders to ground earth in order to have proper electrical connections. Moreover, it is highly recommended to avoid corrosion.

Equipotential anchor for ladders, manufactured in AISI-304L stainless steel and commercialized for concrete and liner pools. The anchors are composed of a recessed base on the ground, washer, screws and the equipotential bonding.

Each ladder needs to 2 units.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Concrete pools	73318	1	0.45	0.002
Liner pools	73319	1	0.50	0.002

PAL II PORTABLE CHAIRS

for disabled

S·R·Smith.

- Portable chair for disabled.
- No assembly required in pool deck area.
- The rechargeable 24V battery powers a mechanical actuator, ensuring that the chair is already ready for use. 30-Cycle duration once charged.
- The perfect solution for facilities with multiple pools as it can be set up anywhere along the pool deck and put away when not in use.
- Waterproof remote control.
- Easy to use, even for the end user. Just roll the chair to the edge of the pool, lock the wheels, set the stabilizers, and it is ready to use.
- Structure made of waterproof materials to prevent corrosion.
- Armrest and footrest included.
- The Pal makes any pool accessible in seconds. It is truly the easiest way to get everyone into the water.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
PAL II chair. **Counterweight in cement blocks.**	69444	1	-	-

* Ask your AstralPool distributor about infinity pools, spas and other non-standard models.

SPLASH SEMI-PORTABLE

pool hoisting system for disabled people

S·R·Smith.

- Semi-portable chair installed on the pool deck for disabled people.
- Includes a cart to carry the chair in order to install it in different locations.
- Installation requires a ground anchor. Its 24 V rechargeable battery supplies power to a metallic actuator, ensuring that the device is always ready for use.
- Duration of 30 cycles once loaded.
- Waterproof remote control.
- The Splash is equipped with a water resistant structure to prevent corrosion and it has armrests and a footrest.
- Its load capacity of 136 kg and its 359° swivel makes it one of the most practical solutions for disabled access to the pool.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Splash Chair	53924	1	390	1.789

HYDRAULIC POOL HOIST

ASTRALPOOL △

- It is made up of a structure made of polished Ø 43 mm AISI-316L stainless steel pipes to which the hydraulic mechanism supporting the chair is fitted.
- For the hydraulic mechanism to work there needs to be a water supply with a minimum pressure of 3.5 kg/cm^2.

	Code	Standard Pack	Standard weight in kg	Standard volume in m^3
Fully equipped hoist				
with a 650-mm-long handrail	71657	1	-	-
with a 1000-mm-long handrail	71658	1	-	-
Optional:				
Headrest	71185	1	-	-
Foot rests	71186	1	-	-

INSTALLATION:

The external attachment is by means of two fixed metallic anchors (supplied with the device) and two adjustable front supports, which make it possible to adjust the hoist to the finishes of different swimming pools.

To make it easier for people that require a hydraulic hoist chair to get in and out of leisure or hydrotherapy pools. Easy to assemble.

Min. swimming pool depth: 1 m

HYDRAULIC POOL HOIST

ASTRALPOOL △

- It is made up of a structure made of polished Ø 43 mm AISI-316L stainless steel pipes to which the hydraulic mechanism supporting the chair is fitted, and a ladder at the side for the assistant.
- For the hydraulic mechanism to work there needs to be a water supply with a minimum pressure of 3.5 kg/cm^2.

	Code	Standard Pack	Standard weight in kg	Standard volume in m^3
L-650 Railings	28619	1	18.7	0.253

SHOWERS

SHOWERS WITH TIMERS

SHOWER WITH TIMER and 4 shower heads

ASTRALPOOL

AISI-304L polished stainless steel shower, specially designed for high footfall facilities (public or semi-public pools). AstralPool showers for public facilities are characterised by their highly resistant materials, considered vandal-proof, and the water savings made thanks to their built-in flow limiters. Showerhead height from floor: 2 m. Fastened to floor with screws, with anchoring fixture incorporated. Fastens to ground with screws and includes an anchoring fixture.

WAVE SPLASH BUCKET

AstralPOOL

Designed and manufactured according to the standards EN-1176. It has nozzles embedded and rotating parts that avoid grips and entrapments in order to ensure maximum safety.

Used materials:

• Aisi-304L stainless steel painted with powder coating of polyester, matt finish and treaty against the heat.
• Drive nozzles made of synthetic polymer POM.
• AISI-304L stainless steel hardware vandal-proof.
• Feet protection to prevent children from damage.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Wave Splash bucket	IS-30A47	1	-	-

How is it installed ?

It is necessary to soak it into the concrete anchor and connect it to a water intake.

Game

Anchoring

Measurements	195 X 140 X 455 cm
Age range	4 - 15 years
Users	8 users
Water outlets	1 unit
Pool depth	From 0 to 35 cm
Pressure	105 Pa
Water flow	200 lpm

ASTRALPOOL BIKE

ASTRALPOOL BIKE

ASTRALPOOL △

Aquabike made of square and rectangular polished AISI-316L stainless steel pipe. Ideal for gyms, wellness centres, spas, medical facilities, hotels and private pools.

• Made of AISI-316L stainless steel.
• Adjustable height of saddle and handlebar.
• For use in public and residential pools from 1 to 1.5 metres in depth.
• Ergonomic.
• Pedals made of PUR.
• Easy to move about.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
AstralPool Bike	67333	1	20	0.12

GRILLES FOR OVERFLOW

GENERAL NOTE FOR ALL MODELS

Made of PP stabilized against UV rays. The whole range comes in white. Ask your dealer about other colours.

Made up of tiles in modules for straight and curved sections (outer radius of 1 or 2 m), they click into place (male-female fitting), which gives certain leeway in assembling them, as well as absorbing their potential expansion due to the temperature changes to which they are exposed.

For all models of grating, a channel 5 mm wider than the grating must be built so that it easily fits into place and any potential expansion is prevented.

Channel width	Grating width
200	195
250	245
300	295
350	345

The height (h) of the grating varies depending on the model.

– Longitudinal model h = 24 mm

– Transversal model h = 22 mm and h = 35 mm

LONGITUDINAL MODEL

0% water

100% water
The longitudinal design of this model ensures that any excess water from the pool is not allowed to overflow onto the pool deck, thus maintaining it practically dry.

CONCRETE POOL
MAIN DRAINS

POOL MAIN DRAINS INFORMATION

How affects UNE-EN 13451-3:2012+A3:2016 main drains in commercial pools

NEW POOL		POOL RENOVATION	
Suction rate: insure a maximum of 0.5 m/s paragraph 4.6.1			
ANTI-VORTEX COVER	**NON ANTI-VORTEX COVER**	**WITH MAIN DRAIN BODY CHANGE**	**UNCHANGED MAIN DRAIN BODY**
Number of main drains per pool: **1**	Number of main drains per pool: **2** balanced main drains, **distanced at minimum 2 meters.** And if any of the **2 main drain** is blocked the remaining one **should be able to absorb 100%** of the installation flow. According to paragraph 4.6.1a (1, 2 and 3)	Applies **new pool rules**	Install an **anti-vortex grille** on pre-installed main drain According to paragraph 4.6.1b (1, 2 and 3) or one or more additional main drain shall be installed as paragraph 4.6.1a (1, 2 and 3)
According to paragraph 4.6.1b (1, 2 and 3)			

RISK OF ENTRAPMENT

How to prevent it?

Another possibility is to install a compensating tank.

CAVITY DIMENSION

Main drain should respect a certain cavity dimensions according to a mathematical rule.

In addition to the main drain requirements a vacuum system may be provided.

OTHERS

Other requisites are considered to define that a main drain in compliant with EN, like design.
e.g. the design of the grill to avoid human body parts or hair entrapment.

Only with the fulfillment of all requisites of the standard, a Compliance Certification can be delivered!

*Anti-vortex plate is a special component installed in the suction line to control the turbulence in a flowing fluid. These plates allows to control the velocity of the fluid thus preventing cavitation in the fluid according to UNE-EN 13451-3.

CONCRETE POOL

MAIN DRAINS

- **All main drains in the range are supplied with UV protection.**
- **To prevent the risk of suction, install the main drains according to local regulations.**
- **Recommended use: Maximum suction rate of 0.5 m/s.**
- **Install at least 2 main drains, each with a suction capacity able to handle the pool's full flow rate.**

NORM MAIN DRAIN

AstralPOOL

Range of main drains suitable for public and private swimming pools. Supplied with flat or antivortex grilles. Manufactured in ABS with UV treatment, fitted with a 2" side outlet and a 1½" bottom outlet connection, bottom outlet covered by semi-die cut tab.

EN 16713-2

3" ADJUSTABLE POOL FLOOR return inlet

Made of white ABS. Suction. Comes with gaskets, flanges and screws. Flow rate adjusted by turning the grille. Suction surface area: 0.015 m². Flow rate at 0.4 m/s: 20 m³/h. Max. recommended flow rate: 26 m³/h. (0.5 m/s.).

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Grille in AISI-304 stainless steel	08316	2	2.65	0.047
Grille in white ABS	11795	2	2.65	0.047

DOUBLE GASKET KIT

Kit made up of a double gasket and the screws necessary for the installation of nozzles in panel pools. Made of TPE, the kit enables the installation of various accessories in pool shells and protects the panelling from coming into contact with water. Easy to install. Prevents corrosion of the panelling in the area that has been die cut.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Inserts for nozzles	43455-0500	80	-	0.035

RETURN INLET/SUCTION NOZZLE

for high flow rates

Return inlet for large flow rates that can also be used as a suction nozzle. Maximum suction flow rate of 30m³/h for a maximum flow rate speed of 4 m/s. Maximum suction flow rate of 5 m³/h for a maximum flow rate speed of 0.5 m/s. PVC body. Connection for Ø 75 or Ø 90 mm pipe. Inlets can be installed into bushing 43590. Grille can be adjusted in any direction.

POOLS

BUILDING SOLUTIONS

ASTRALPOOL

PISCINE LAGHETTO®

MODULAR PREFABRICATED POOLS

ASTRALPOOL △

Freestanding modules for pools and spas, with a reinforced, waterproof composite, ready for the final coating.

Prefabricated modules with all accessories and wall conduits to ensure watertightness in the event of vibrations and water hammer.
The thermal expansion coefficient of our prefabricated modules is far superior to that of concrete, as a result of which they do not crack over time because structural movement due to expansion and contraction are absorbed.

Ideal for refurbishments, roof tops, basements, etc. Their modular design makes them extremely easy to transport and work freely on the building site.

Exclusive designs without any restrictions, thanks to our computer-controlled systems that enable our clients to come up with their own designs without the need for casts, thus avoiding manual errors.

The prefabricated component parts make it possible to build and refurbish pools to the designers exact specifications, as well as enabling a pool to have exactly the same finish as a traditional one.

- Installation on complex sites
- Modular and freestanding
- Energy savings
- Resistant to water load
  Lightweight framework
- Prefabricated system

MODULAR PREFABRICATED POOLS

ASTRALPOOL

The top finish can be directly applied to the insulation material, which protects it from potential condensation between gaps that give rise to the proliferation of micro-organisms organisms that are a health hazard for humans.

Hardly any power loss (λ= 0.033 W/mK) in comparison with concrete (λ= 2.30 W/mK), which means it pays for itself in a very short space of time.

To ask for a quote, contact your area sales rep.

INOXPOOL - Installation

AstralPool

PREPARATION OF THE GROUND

TRANSFER TO LOCATION

The base the spa or pool must be prepared.

Manufactured in one piece, your transfer must be made by an authorized mode of transport.

The transfer must be made in a reinforced trailer or truck so that it arrives at its destination in perfect condition.

TRANSFER BY CRANE

UNLOADING THE POOL

LEVELING AND ADJUSTMENTS
Facilities must have easy access (outside) to be able to install the crane that will help to unload the Spa or Pool and put it in place.

The installation must be checked and secured so that everything is in perfect order.

Assembling the connections and putting it into operation is the last step before you can enjoy a relaxing and dreamed of space of well-being.

Ask for your new **Spa & Pool INOX SOLUTION** catalogue by AstralPool

SKYPOOL

ASTRALPOOL △

PANEL POOLS, THE VERY LATEST TECHNOLOGY THAT ENSURES PRECISION AND ACCURACY

The easiest, quickest and surest way of building any required residential and commercial pool. SkyPool is AstralPool's range of prefabricated panel pools that can be adapted to fit existing infrastructures or new ones.

The use of these totally prefabricated panels that are easy to fasten and assemble together means that an in-ground or above-ground pool can be built in record time.

The steel panels undergo hot-dip galvanization in a bath of zinc, which gives them excellent protection against rusting so that they last longer and their safety is guaranteed throughout their service life.

SKYPOOL - Experts in end-to-end solutions

ASTRALPOOL △

Thanks to SkyPool, AstralPool is the undisputed world leader in prefabricated pools made of galvanized steel panels. Our flexibility and drive, in addition to the way we adapt to the needs and regulations of each market have led us to build pools in more than 60 countries, which has made us one of the companies with the greatest international outreach in the sector.

Award-winning competition pools.

As leaders in this sector, we have longstanding experience in the development of solutions for the world of competition. We make pools of any size including the required by FINA standards and regulations.

End-to-end solutions.

AstralPool has a multidisciplinary team able to give you support in the development of your project from beginning to end, as well as the degree of experience and know-how expected of a world leader:

· Project analysis.
· Preliminary design study and quote.
· Advice and water treatment.
· Manufacture.
· Worksite management.
· Installation of complete solutions.

SKYPOOL - The best choice for many reasons

ASTRALPOOL

Quick
The use of completed prefabricated components together with the easy assembly system considerably reduces the time required to build a pool.

Versatile
This system can be used for any design, whatever a pool's shape.

Long-lasting
New design and manufacturing systems are used to obtain maximum quality, functionality and durability of all pool components. The metal structure has a 20-year warranty.

Lightweight
Choose a place and we'll build a pool there! The advantage of the lightweight structure that is easily adaptable is that pools can be built even in awkward conditions. Small spaces, rooftops, stadiums, etc.

Inexpensive
As no complex infrastructure has to be built, a high performance pool can be obtained at a lower cost.

Reliable
The use of the very best components, together with a totally safe construction system, delivers the reliability required in this type of facility.

Sustainable
All components can be recycled, are non-contaminating and are manufactured using processes with a low environmental impact.

SKYPOOL - Advantages

ASTRALPOOL

1. Technology.

Thanks to the technology used in the construction of SkyPool panels, they are fully compliant with FINA regulations. There is an extremely easy and efficient system for adjusting the level and angles of a pool. The access through the system's manholes enables all adjustment to be made.

2. Watertight. No leaks.

There are no cracks. The perfect fit of the assembled SkyPool panels covered by the liner ensure the pool shell is completely watertight. Furthermore, the system has been designed to withstand land movements and subsidence, in addition to the pressure exerted when a pool is emptied or filled.

3. High resistance finishes.

The PVC-P reinforced liner used by SkyPool is watertight, which gives these pools a high level of safety, protection, robustness and durability. Furthermore, it is resistant to chlorinated water and aging caused by external agents. The liner ensures elasticity and is available with a wide range of optional features (colours, etc.).

4. Quicker installation time.

It can take as much as two months off the time to manufacture and install an Olympic SkyPool (50 x 25 x 2 m) in comparison with a concrete pool. This considerably reduces indirect and opportunity costs.

5. Low maintenance.

As there is access to the pool perimeter, any problems are more quickly located, so repair and maintenance work is easier and costs less.

6. Earthquakes resistant.

Build earthquake-resistant pools. The team of Skypool engineers calculates and adapts the system according to the seismic regulations of each country. Under request.

SKYPOOL - The best performance

ASTRALPOOL

Technology

Thanks to the technology used in the construction of SkyPool panel pools, their precision and accuracy comply with FINA regulations.

We have leveling and dimensional tolerance adjustment systems, in addition to materials resistant to subsidence and expansion.

A SkyPool is the result of experience and the use of cutting-edge technologies for the design, manufacture and installation of our pools.

Readily accessible pools that are easy to run

A typical pool installation can be checked from a technical gallery that provides access to the back of the panels for inspection, maintenance and repair work. This means that pools do not have to be emptied for such work, so they are easy and profitable to be run as a business concern.

Engineering calculations

The structural calculations for SkyPool panels are made to ensure the resistance of our installations and compliance with European and local standards. We make specific seismic calculations in order to comply with the most rigorous standards and to ensure resistance to potential earthquakes.

SKYPOOL - The best performance

ASTRAL POOL

STANDS:

System of stands that provide better stability on the ground.
TENSIONER:

The tensioners are adjustable and enable a pool to be assembled down to the last millimeter.
OVERFLOW CHANNEL:

Totally modular. Can be made to be used with different grill and tile sizes.

LEVELING:

With a chemical anchoring fixture (30 mm)

REINFORCED BRACKETS:

The brackets deliver greater resistance and stability in the overflow channel and panel area.

60°
SKYPOOL - Specific panel types

ASTRALPOOL

STEP PANELS

Panels with built-in ladders that comply with FINA standards. Supplied with split ladder, fastenings and asymmetric handrails to make it easy for swimmers to get in and out of a pool.
SWIMMER FOOTHOLD PANEL

Built-in foothold at a depth of 1.2 m for swimmers to rest.
GLASS SIGHT PANEL

Glass windows so that trainers and physiotherapists at high performance and rehabilitation centers are able to observe swimmers underwater.
WITHOUT CERAMICS PANEL

Specially designed panel which does not need the front edge ceramic tile.
INCLINED PANEL

Inclined panels can be supplied to the specifications of an architectural project.
CURVED PANEL

Round and semicircular panels.

Ideal for wellness centers and leisure areas.

SKYPOOL - Panel models

ASTRALPOOL

BARCELONA PANEL

Freestanding galvanized steel panel suitable for pools of up to 2.2 m. Fastenings are only required at the bottom.

The Barcelona panel was designed for the first time for the 2003 World Swimming Championships in Barcelona. The pool was installed inside the Sant Jordi palace, on the basketball court without damaging the ground.

Its self-supporting system allows it to be anchored to a concrete slab without the need to fasten a pool's outer decking to the slab. This design makes possible the differential absorption of the subsidence of the slab at the base of a pool. The panels can be supplied in hot-dip galvanized steel and stainless steel.

CAR PANEL

Freestanding galvanized steel panel suitable for pools of up to 5 m. Fastenings are required at the top and on the bottom.

The range of prefabricated panels CAR (High Performance Center) for the training of elite athletes, are specifically designed for large pool heights with the aim of meeting all standards for Olympic, semi-Olympic, Paralympic, world swimming championships and water sports, such as water polo, jumping and synchronized swimming.

They are designed with a strong metal lattice framework anchored both to the concrete slab and to the formwork of a pool's decking.

MELBOURNE PANEL

Freestanding galvanized steel panel suitable for pools of up to 3.5 m with structure to install the surround of the pool.

The prefabricated Melbourne panels were designed for the 2007 Swimming World Championship in Melbourne. The main characteristic of these panels is their heights that vary between 2.5 to 3.5m. The self-supporting framework is anchored to the base slab and has a structure for building the outer decking. Ideal for building Olympic and synchronized swimming pools.

Temporary events. This type of panel is suitable for use in temporary events. The design of these pools makes it perfectly feasible to add bleachers in a stadium and they have an outer decking.

RENOVATION PANEL

Renovation panels are the ideal solution for any old pools that have to be renovated to adapt to current standards and to give them a new lease of life.

Quick and easy to fit without the need to demolish the whole of a pool. Using galvanized steel renovation panels, only the pool's coping has to be demolished and a new overflow channel installed. Ceramic and non-ceramic finishes are available, and they have built-in drainage outlets. The most inexpensive solution to give your pool a new lease of life.

WATERPROOFING OF THE POOL using a reinforced PVC-P liner

ASTRALPOOL △

The liner made of 150/100 reinforced PVC-P (plasticized polyvinyl chloride) is the most commonly used system for covering liner pools as it is extremely flexible, resistant to tearing, easy to weld, resistant to bleaching from UV rays and because it comes in a wide range of colors.

POOL WARRANTY: 5 YEARS
ACCESSORIES WARRANTY: 2 YEARS
The Bluespring structure technology is made of galvanized and passivated steel with low-carbon Z275 coverage, treated with the exclusive protective Laghetto ZMSV-TEC coating.

All the ground supports, the threaded rods anchors, the moving parts and the nuts and bolts are made of stainless steel.

The Bluespring ZMSV-TEC structure provides a full height ground retaining panel if used as a classical inground pool, or is equipped with a shortened panel in case it is mounted in above ground situations.

Bluespring offers two standard heights for the pool panel: **130 and 152 centimeters**.

Higher or variable water depth can be obtained directly by varying the design of the bottom slab.

BLUESPRING - Compensation system

With Bluespring balance tank is not necessary, thanks to the use of big and capacious overflow duct, which allows to avoid the construction of the external compensation tank, with consequent and evident of space and cost savings.

BLUESPRING

PISCINE
LAGHETTO®
High-tech, endless beauty

When the sides of the overflow blend with the sky and with the surrounding atmosphere, the fulfillment of the perfect pool is realized, the time when the pool disappears and binds to the infinite lines.

Elegant and exclusive, Bluespring is the infinity pool suitable for every need: do sport comfortably at home, relax after work or enjoy time with the family, in the privacy of your own home.

The perimeter overflow is the best filtration system for floating impurities: the water overflows from the edge into the channel under the perimeter paving and enters the filtration system.

With the overflow channel, therefore, you will no longer need the external, underground, bulky and expensive compensation tank. Reduced construction times and low impact building works guarantee an immediately usable space; the self-supporting structure remains intact over the years and allows easy and quick maintenance and control.

The best technology at the service of demanding customers who believe in the beauty of their own water space.

Use with drinking water [6]	450-2000	2.5
Top manhole Ø400	1050-2000	2.5

[2] Recommendation: The lateral manhole option is for all filters with nozzle plate or with laterals, whose height (H) is higher than 2 m. The main reason is to facilitate the access to the interior without working at height. More than one lateral manhole can be installed. The distance between the inlet/outlet ports and the manhole is always the same, rotated 45° to the right by default. It can be modified as per your requirements.

[S] More than one Sight Glass can be placed. The vertical position is standard and the center of the sight glass is placed at the level of the depth bed media, rotated 45° to the left of the inlet/outlet by default. It can be modified as per your requirements.

[4] Maximum concentration of ozone 0.5 ppm in the water and maximum temperature 40°.

[5] Maximum allowed concentration of salt 45 gr/l (seawater).

[6] A certificate of the material suitable for use with drinking water is included.

FILTER WITH LATERALS

FILTER WITH NOZZLE PLATE

STANDARD EQUIPMENT	Filter with laterals Collector system slots 0.3 mm	Filter with nozzle plate Collector system slots 0.5 mm
Top manhole Ø 400	Ø 1050 - 2500	
Air relief 3/4"	Ø 1050 - 2500	
Sand drain Ø 200	Ø 1050 - 2500	Lateral manhole is recommended
Water drain 3/4"	Ø 1050 - 2500	

OPTIONS TABLE		Ø (mm)	Pressure (bar)
Nozzle plate [1]		1050 - 2500	2.5 - 4
Lateral manhole [M]	Ø 225 mm	1050 - 2500	2.5 - 4
	Ø 400 mm	1050 - 2500	2.5 - 4
Sight glass [S]	Ø 75 mm	1050 - 2500	2.5 - 4
	Ø 135 mm	1050 - 2500	2.5 - 4
Vinylester. Ozone use [4]		1050 - 2500	2.5 - 4
Use with salt water [5]		1050 - 2500	2.5 - 4
Use with drinking water [6]		1050 - 2500	2.5 - 4

[1] Nozzle plate with 0.5 mm slots suitable for air scouring.

[M] Recommendation: The lateral manhole option is for all filters with nozzle plate or with laterals, whose height (H) is higher than 2 m. The main reason is to facilitate the access to the interior without working at height. More than one lateral manhole can be installed. The distance between the inlet/outlet ports and the manhole is always the same, rotated 45° to the right by default. It can be modified as per your requirements.

[S] More than one Sight Glass can be placed. The vertical position is standard and the center of the sight glass is placed at the level of the media, rotated 45° to the left of the inlet/outlet by default. It can be modified as per your requirements.

[4] Maximum concentration of ozone 0.5 ppm in the water and maximum temperature 40°.

[5] Maximum allowed concentration of salt 45 gr/l (seawater).

[6] A certificate of the material suitable for use with drinking water is included.

ASTRALPOOL

- Made of polyester resin and fibreglass.
- Equipped with pressure gauge, and manual air and water purge valves.
- Ø 400 mm top lid.
- Suitable for filtration velocity of 20, 30, 40 and 50 m³/h/m².
- All filters can be assembled with valve manifold.
- Collector arms and optional nozzle plate.

Bed depth 1.2 m

Maximum pressure: 2.5 kg/cm².

Does not include valve manifold

Optional: Standard American sizes

OPTIONS TABLE	Ø (mm)
Nozzle plate [1]	1050 - 2000
Lateral manhole Ø 225 mm [S]	1050 - 2000
Lateral manhole Ø 400 mm [S]	1050 - 2000
Mirilla Ø 135 mm [M]	1050 - 2000
Vinylester. Uso con ozono [4]	1050 - 2000
Use with salt water [5]	1050 - 2000
Use with drinking water [6]	1050 - 2000
UV resistant. Outdoor use	1050 - 2000
Air scouring connections 2"	1050 - 2000

[1] Nozzle plate with 0.5 mm slots suitable for air scouring.

[M] Recommendation: The lateral manhole option is for all filters with nozzle plate or with laterals, whose height (H) is higher than 2 m. The main reason is to facilitate the access to the interior without working at height. More than one lateral manhole can be installed. The distance between the inlet/outlet ports and the manhole is always the same, rotated 45° to the right by default. It can be modified as per your requirements.

[S] More than one Sight Glass can be placed. The vertical position is standard and the center of the sight glass is placed at the level of the media, rotated 45° to the left of the inlet/outlet by default. It can be modified as per your requirements.

[4] Maximum concentration of ozone 0.5 ppm in the water and maximum temperature 40°.

[5] Maximum allowed concentration of salt 45 gr/l (seawater).

[6] A certificate of the material suitable for use with drinking water is included.

BOBBIN WOUND FILTERS

OSLO FILTERS

ASTRALPOOL △
BED DEPTH FILTER: 1.2 M

• Bobbin wound filters made of polyester resin and fibreglass.
• Equipped with pressure gauge, and manual air and water purge valves.
• Ø 400 mm top lid cover.
• Suitable for filtration velocity speeds of 20, 30, 40 and 50 m³/h/m².
• All filters can be assembled with valve manifold.
• 2 ½" sand discharge outlet.
• Collector arms and optional nozzle plate.

Bed depth 1.2 m

Does not include valve manifold

Optional:
Standard American sizes

For all filters with nozzle plate, a side manhole is recommended for easy discharge of media

Other specific depths may be made to order

Coding options according to table on page 158

Vinylester. Ozone use [4]	1050 - 2500	2.5 - 4 - 6
Use with salt water [5]	1050 - 2500	2.5 - 4 - 6
Use with drinking water [6]	1050 - 2500	2.5 - 4 - 6
UV resistant. Outdoor use	1050 - 2500	2.5 - 4 - 6

[5] More than one Sight Glass can be placed. The vertical position is standard and the center of the sight glass is placed at the height of the depth bed. The position for the connections can vary and, by default, it is placed 45° left to the connections.

[4] Maximum concentration of ozone 0.5 ppm in the water and maximum temperature 40°.

[5] Maximum allowed concentration of salt 45 gr/l (seawater).

[6] A certificate of the material suitable for use with drinking water is included.

CODING

ASTRALPOOL △

The filter code is composed of eight digits. The first five digits correspond to the filter code and the last three digits correspond to the model – this information is given in the tables below.

This codification system is used for the Praga, Oslo, Olot, Rodas, Vic, Europe, Vesubio and Delta filters.

Position	1	2	3	4	5	–	6	7	8

Position 1 to 5: Five digit code of the standard product.

Position 6 **Specifies the nozzle plate and vinylester options**	
0	Filter without nozzle plate
1	Filter with nozzle plate
2	Vinylester finish
3	With plate and vinylester
4	1" double effect priming valve kit
5	1" double effect priming valve kit + plate
6	1" double effect priming valve kit + plate and vinylester
7	2" double effect priming valve kit
8	2" double effect priming valve kit + plate
9	2" double effect priming valve kit + plate and vinylester

Position 7 **Specifies side opening options**	
0	Without nozzle plates
1	1 Ø 225 mm manhole
2	1 Ø 400 mm manhole
3	2 Ø 225 mm manholes
4	2 Ø 400 mm manholes
5	1 Ø 500 mm manhole

Position 8 **Specifies sightglass options**	
0	Without sightglasses
1	1 sightglass for laminated filter
2	1 Ø 135 mm sightglass
3	2 Ø 135 mm sightglasses
4	2 Ø 225 mm manholes

Notes: Rodas filters with nozzle plates are not available.
     Ø 500 mm side opening for filters as of Ø 1050 mm.
     Maximum vinylester option of 0.5 ppm.

Please enquire pricing for various options:
     - Vinylester finish
     - Ø 225 mm and Ø 400 mm manhole
     - Sightglass
     - Plate

FILTRATION

VALVES MANIFOLD

ASTRAL POOL

Manual Manifold. 5 Butterfly Valves

Split-up

- Butterfly valve.
- Regulable opening every 15° with position holding.
- One piece body in PVC-U.
- Fixed in the set with galvanized steel screws.
- Standard flanges DIN 2501.

Electric Manifold. 5 Butterfly Valves
Split-up
- Butterfly valve with electric actuator J+J 80-240V.
- Electronic torque control, with limitation of maximum torque.
- Anti-condensation heating resistor.
- Automatic / manual lever, with manual override.
- Open and closed volt free contacts.
- Indicator LED operating / error.
- Enclosure in anticorrosive polyamide.
- Standard flanges DIN 2501.
- Fixed in the set with galvanized steel screws.

Pneumatic Manifold. 5 Butterfly Valves

Split-up
- Butterfly valve with pneumatic actuator CH-air with limit switch box.
- Rack and pinion drive.
- Valve position visualization.
- NAMUR connection that allows the assembly of the solenoid valve.
- Final position regulation in the actuator (+/- 5°).
- Fixed in the set with galvanized steel screws.
- Standard flanges DIN 2501.

VALVES MANIFOLD CODIFICATION

ASTRALPOOL △

Ø OUTLET + MODEL + Ø FILTER

CODING EXAMPLES FOR 1 FILTER
-5 valves, manual. Olot filter Ø1200-125 00785 OL 12

CODING EXAMPLES FOR 2 FILTERS
-5 valves, manual 2 filters Prague Ø1600-125 09180 2BS 516

In this case, it's necessary to search the equivalent outlet for two filters with Ø125 according to the filtration speed. For this example, the speed is 50 (indicated by a 5 at the beginning of the last two digits) and the outlet is Ø200. The number of filters is indicated in front of the filter model, in this case, 2.

REGENERATIVE MEDIA FILTERS

FMR Regenerative media filters

- The filter is the basic unit that we must select based on the desired flow rate. Speed is an important factor, a minimum of 1.3 m³/h/m² and a maximum of 4.8 m³/h/m² is established.
- The bypass valve battery is used to carry out backwashing and maintain the filter in maintenance with water circulation in the system. It is possible to choose between manual or automatic bypass, the latter using pneumatic valves.
- The cabinet is the necessary mechanism to cause the filter regenerations and in the case of the monitored system for the management of probes, system pumps, peripherals and communications.
- The components, such as flow, pressure, temperature, conductivity sensors, are necessary to connect them to the cabinet and to monitor the values of the pool.

The regenerative media (perlite) filters are designed for efficient water purification in pools for collective use. The water filtration system uses perlite as a regenerating filtration media, capable of filtering water down to 1 micron and with low water, energy and chemical requirements compared to traditional flint and glass filters.

FMR filters main components:

- Cylinder and internal candles made of AISI-316 STAINLESS steel.
- Vibrator and compressor for regeneration.
- Perlite filtration media.
- Pressure gauge panel for pressure control.
- Connection flanges to the installation.

As an option:

- Manual valve manifold
- Automatic valve manifold
- Basic control cabinet (BASIC)
- Basic control cabinet with automatic bypass (BASIC AUT)

BYPASS VALVES MANIFOLD

Filter bypass can be manual or automatic, this last with pneumatic valves. Therefore, an air compressor must be available.

Bypass valves manifold includes:

- Piping, flanges, screws and gaskets.
- Filter inlet check valve.
- Automatic (with pneumatic drives) or manual valves depending on version.

BASIC FMR CONTROL CABINET

The regenerative media filter control cabinet consists in a basic control panel and automation to do the filter regeneration and management in a fully automatic way. The filter renewal will be every 4 hours, with a programmable filtration system shutdown and a regeneration of the filtration media by controlling the filter vibrating system. Only with the filter regenerating control box the system will be allowed to do the regeneration in a fully automatic way.

Control box includes:

• Basic control box.
• Automation for regeneration control and filter management.

PUMPS

ASTRALPOOL

VICTORIA PLUS SILENT VS

ASTRALPOOL

The Victoria Plus Silent pump for residential pools comes with two motor powers, has variable speeds and can be automatically controlled.

This pump has been designed for both new-build pools and as a replacement for pumps already fitted.

Significant power savings can be made thanks to the use of variable speeds and the timer.

The pump is compatible with the Fluidra Connect platform.

It has a built-in HMI controller with the possibility of mounting it on a wall for better usability.

Bathers experience a greater feeling of well-being due to the reduced noise level.

There are digital inputs and outputs for the smooth running of all pool units, such as the salt chlorinator and heat pump. It includes a power factor correction function for reducing current flow. It does not require an external power pack for Fluidra Connect.

VICTORIA PLUS SILENT

ASTRALPOOL △

A self-priming pump with single-phase and three-phase motors. A prefilter is mounted on the body of the pump to prevent foreign bodies from entering it that may damage its hydraulic parts. The motors supplied come with an IP-55 protection rating and have been prepared to withstand hot environments and high levels of humidity. GS marking. The main characteristics of Victoria Plus Silent are:

- Low noise level: between 61 dB and 70 dB.
- Easy to use: Prefilter cap with 2 levers included (no spanner needed).
- Compatibility: Fully compatible in pools fitted with a Victoria Plus pump.
- Larger front bearing for improved axial thrust.
- PVC accessories assembly included in pump.

PERFORMANCE
SELF-PRIMING PUMPS

KIVU

ASTRALPOOL

High performance plastic self-priming pump for high flow rates (1500 rpm).

- 3 power modes: 3 HP, 4 HP and 5.5 HP.
- Low sound level: as low as 59 dBA.
- Hydraulic efficiency without prefilter 78% (as per ISO 9906 standard).
- High quality mechanical seal for salt water.
- IEC high efficiency motors (IE3).
- Standard motor shaft (compatibility with any pump manufacturer).
- Pump comes with pre-filter (in 2 packages: pump + prefilter).

COLORADO with prefilter

ASTRALPOOL

3000 rpm plastic centrifugal electric pumps with prefilter for pools, perfect for large, low-pressure flow rates. Prefilter with transparent lid and wishbone closure; easy access. Pump bodies and prefilter manufactured in fibreglass-reinforced polypropylene. Plastic turbine. Pump shaft and prefilter basket in stainless steel. IE2 motors with 3000 rpm IP-55 protection at 230/400 V or 400/690 V and 50 Hz. From 4 HP to 12.5 HP.

HIGH EFFICIENCY IE2 Motors Compliance

IE3 version: The same codes with suffix -320

Possibility of placing orders with the following variations:
- bronze turbine
- stainless steel turbine (AISI 316-L).
- Viton mechanical seals.

ARAL C-3000

ASTRALPOOL

Made in cast iron. Mechanical seal in stainless steel. IP-54 motor protection. AISI-316 stainless steel shaft. With stainless steel AISI-304 strainer basket and prefilter. 3000 rpm.

Connections PN 16 according to DIN 2501. Also available with bronze impeller.

AIR BLOWERS

ASTRALPOOL △

Air pump designed for spas, baths, hydromassage installations and similar which produces a constant stream of air bubbles at medium and high air volume levels. It can also be used to stir up the filter bed, for example in back wash cycles where a low intensity air current is required.

The filter casing and impeller are made from an injected aluminium alloy whilst the motor spindle is manufactured from stainless steel, with the impeller dynamically balanced and directly adapted to the spindle. The motors, single phase or 3 phase for continuous use, are made from steel in compliance with CEI 2/3 1988 regulations, and feature IP54 external protection and class-F insulation. The standard voltages are100-120/200-240V for the monophase range and 200-240/380-440V for the triphase models, at 50/60Hz. The pumps can be mounted horizontally or vertically. Moreover, since there is no contact between the mobile parts and the pump static discharges, neither lubrication nor maintenance is necessary and it does not cause wear on the parts.

The turbines have a maximum working temperature of 40°C. Do not use in conjunction with aggressive, inflammable or explosive gases.

TECHNICAL FEATURES

Product name + Description

Product benefits

Formats	Duration Efficacy in the water	Type of pools	Dose Dose per m³
Granulate	1″ Immediate	All pools	
Tablets	8h	pools with skimmer and sand filter	
Liquid	Daily	Special sand filter	
Concentrated liquid	10 Days	Special liner	
Powder	Recovery	Special tile	

POOL CHEMICALS ASTRALPOOL

REGULATORS

SOLID PH MINOR

ASTRAL*POOL*

Solid pH reducer. For adjusting the pH to between 7.2 and 7.6.

	Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Square packaging	5 kg	74651	4	720	-
Special product under order	-	-	-	-	-

SOLID PH PLUS

ASTRAL*POOL*

Solid pH enhancer. For adjusting the pH to between 7.2 and 7.6.

	Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Square packaging	5 kg	74896	4	720	-
Special product under order	-	-	-	-	-

LIQUID PH MINOR

ASTRAL*POOL*

Liquid pH reducer. Ideal for dosing with a pump.

	Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
For professional use only	10 l	43290	1	400	-
For professional use only	20 l	73140	1	600	-

LIQUID PH PLUS

Liquid pH enhancer. Ideal for dosing with a pump.

	Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
	20 l	74863	1	600	-

ALKALINITY ENHANCER

ASTRAL*POOL*

Powder for increasing water alkalinity when it falls below 125 ppm.

	Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Square packaging	6 kg	15976	4	864	-
Special product under order	-	-	-	-	-

POOL CHEMICALS ASTRALPOOL

ALGICIDES

ALGICIDE

ASTRALPOOL △

Prevents the formation of algae in pools.

Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
25 l	11418	1	600	-

ALGICIDE WITH BRIGHTENER

ASTRALPOOL △

A powerful bactericide, algicide and fungicide.

Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
25 l	11415	1	600	-

POOL CHEMICALS ASTRALPOOL

FLOCCULANTS

LIQUID FLOCCULANT

ASTRALPOOL △

Clarifies water by eliminating the colloidal particles that cause cloudiness in water.

Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
25 l	11389	1	600	-

The transition to the new brand's visuals may take some time. It is possible to get products with visuals which have not yet been updated.

POOL CHEMICALS ASTRALPOOL

CLEANERS

SURFACE CLEANER

ASTRALPOOL

Extra strong descaler. Acid.

Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
25 l	11392	1	600	-

SURFACE CLEANER

for polyester and fibreglass pools

ASTRALPOOL

It combats limescale and grease without damaging pool lining.

	Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
	5 l	16558	4	640	-
Special product under order	25 l	-	-	-	-

WATER LINE DEGREASER Non-foaming

ASTRALPOOL

A specially formulated compound for removing scum and dirt from pool edges and walls, and areas around them that may require cleaning.

Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
25 l	11427	1	600	-

WATER TREATMENT PRODUCTS

CLEANERS

NETOLINE Water line

ASTRALPOOL △

Powerful liquid descaler with degreasing properties for cleaning the water line.

Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
25 l	40934	1	600	-

LIQUID FILNET

ASTRALPOOL △

Liquid descaler specially designed for cleaning the inside of sand filters in public pools.

Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
25 l	73558	1	600	-

STAINLESS STEEL CLEANER-POLISH

ASTRALPOOL △

Stainless steel cleaner-polish. It removes stains and degreases all types of stainless steel surfaces.

Format	Code	Standard Pack	Standard weight in kg	Standard volume in m³
5 l	72846*	4	640	-

* New codes replace old codes 18713 and 16630.

WATER TREATMENT PRODUCTS

WATER TREATMENT PRODUCTS
Everything you need for a healthy and perfect water in 4 steps:

1 Balance
Maintains water parameters at optimal levels.

2 Disinfection
Disinfects water and kills microorganisms.

3 Algicide
Prevents algae, preventing their appearance.

4 Crystal Water
Removes dirt and cloudiness, crystal clear water.

Take care of the elements of your pool for a perfect efficacy.

Cleaning products

Take care of your pool during Winter.

POOL CHEMICALS CTX

DISINFECTANTS

CTX 200/GR CLORSHOCK

Chlorine treatment for water recovery.

• Fast-dissolving.
• High water solubility makes it quick to obtain the necessary residual chlorine amount.
• Stable chlorine, lasts longer in the water.
• Does not modify pH.

GRANULATED	EFFICACY	ALL, SPECIALLY LINER AND POLIESTER	DOSAGE
	IMMEDIATE		150g / 10m³

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 200gr Clor Shock	25 kg	10905	1	450	-

CTX 300 CLORLENT

Chlorine treatment for disinfecting the pool.

• Essential for ongoing pool treatment since the disinfectant is released as the water needs it.
• Stable chlorine, lasts longer in the water.
• Suitable for shock treatments and general maintenance.

POWDER	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	DAILY		10g / 10m³

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 300 ClorLent	25 kg	19194	1	450	-

CTX 300/GR CLORLENT

Chlorine treatment for disinfecting the pool.

• Essential for ongoing pool treatment since the disinfectant is released as the water needs it.
• Stable chlorine, lasts longer in the water.
• Suitable for shock treatments and general maintenance.

GRANULATED	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	DAILY		10g / 10m³

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 300/gr ClorLent	25 kg	19195	1	450	-

The transition to the new brand's visuals may take some time. It is possible to get products with visuals which have not yet been updated.

POOL CHEMICALS CTX

DISINFECTANTS

CTX 370 CLORLENT

Chlorine treatment for disinfecting the pool.

• Slow-dissolving and continuous disinfection.
• Stable chlorine, lasts longer in the water.
• Dosing from the skimmer or in a floating dosing device is advised. Avoid direct contact with pools made with a polyester or vinyl liner or painted pools as it can cause discolorations.

These new codes only affect new formulas with low boric (European legislation)

TABLET	EFFICACY	ALL TYPES OF POOLS	DOSAGE
250g	WEEKLY		1 tablet / 25m³

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 370 ClorLent	25 kg	75138	1	450	-

CTX 120 HYPOCAL

Calcium hypochlorite treatment for disinfecting the pool.

• Fast-dissolving.
• Unstabilized chlorine, no cyanuric acid is added to the water.
• Suitable for shock treatments and general maintenance.

GRANULATED	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	DAILY		10g / 10m³

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 120 Hypocal	25 kg	03131	1	450	-

CTX 400 CLORPROTECT

Keeps water disinfected for longer.

• Extends the disinfect action of chlorine since it prevents the rapid destruction caused by ultraviolet sunlight.
• Supplement for salt electrolysis or unstabilized chlorine treatments.
• For outdoor pools.
• Introduce the product in the skimmer or pump prefilter.

POWDER	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	IMMEDIATE		400g / 10m³

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³

WATER TREATMENT PRODUCTS

DISINFECTANTS

CTX 161 CLORLIQUID

Liquid chlorine for continuous water disinfection.

• Unstabilized chlorine, no cyanuric acid is added to the water.
• Suitable for shock treatments and general maintenance.

LIQUID	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	DAILY		500ml / 10m³

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 161 ClorLiquid	20 l	47191	1	560	-

CTX 390 MULTIACTION

Multi-action, occasional-use chlorine treatment.

• Stable chlorine, lasts longer in the water.

GRANULATED	EFFICACY	ALL, SPECIALLY TILE POOLS	DOSAGE
	DAILY		15g / 10m³

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 390 Multiaction	25 kg	19196	1	450	-

CTX 342 MULTIACTION 5

Multi-action chlorine treatment for pool maintenance.

• Slow and continuous dissolution.
• Disinfection, antialgae, flocculant, coagulant, chlorine stabilizer.

TABLET	EFFICACY	ALL, SPECIALLY LINER AND POLIESTER	DOSAGE
250g	WEEKLY		1 tablet / 25m³

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 342 Multiaction 5	25 kg	75142	1	450	-

These new codes only affect new formulas with low boric (European legislation)

The transition to the new brand's visuals may take some time. It is possible to get products with visuals which have not yet been updated.

DISINFECTANTS

CTX 393 MULTIACTION 5

Multi-action chlorine treatment for pool maintenance.

• Slow and continuous dissolution.
• Disinfection, antialgae, flocculant, coagulant, chlorine stabilizer.

These new codes only affect new formulas with low boric (European legislation)

TABLET	EFFICACY	ALL TYPES OF POOLS	DOSAGE
250g	WEEKLY		1 tablet / 25m³

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 393 Multiaction 5	25 kg	75145	1	450	-

CTX 130 BROMINE

Bromine treatment to disinfect the pool.

• Very slow-dissolving and continuous disinfection.
• Pleasant bathing, no odors.
• Does not irritate eyes.

TABLET	EFFICACY	ALL TYPES OF POOLS	DOSAGE
20g	WEEKLY		1.0 - 3.0 ppm

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 130 Bromine	20 kg	27129	1	540	-

POOL CHEMICALS CTX

ALGICIDES

CTX PHOSFREE

Concentrated product to instantly remove algae-producing phosphates by inhibiting their growth.

• Prevents the appearance of algae.
• Compatible with all disinfectants.
• Enhances salt electrolysis output.
• With an easy-to-use dosing bottle.
• Phosphate concentration should be kept below 25ppb to prevent algae formation.

LIQUID	EFFICACY	ALL TYPES OF POOLS	DOSAGE
CONCENTRATED	WEEKLY		12ml / 10m³

	Format	Code	Standard Pack	Pallet LT	Standard volume in m³
CTX Phosfree		63108	12	480	-

CTX 500 ALGASTOP

Prevents algae formation and growth.

• High bactericide, algaecide, and fungicide power.
• Fast-working, long-lasting.

LIQUID	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	WEEKLY		50ml / 10m³

	Format	Code	Standard Pack	Pallet LT	Standard volume in m³
CTX 500 Algastop	25 l	03195	1	600	-

CTX 60 ALGASTOP CRISTAL

Prevents algae formation and growth.

• Clarifies the water, increasing transparency.
• Keeps water blue.

LIQUID	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	WEEKLY		50ml / 10m³

	Format	Code	Standard Pack	Pallet LT	Standard volume in m³
CTX 60 AlgaStop Cristal	5 l	03190	4	640	-
Special product under order	25 l	-	-	-	-

The transition to the new brand's visuals may take some time. It is possible to get products with visuals which have not yet been updated.

POOL CHEMICALS CTX

ALGICIDES

CTX 530 ALGASTOP ULTRA

Prevents algae formation and growth.

- High bactericide, algaecide, and fungicide power.
- Fast-working, long-lasting.
- Non-foaming, making it ideal for pools with counterflow systems or similar, water parks, etc.

LIQUID	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	WEEKLY		**25ml / 10m³**

	Format	Code	Standard Pack	Pallet LT	Standard volume in m³
CTX 500C Algastop Power	25 l	03205	1	600	-

POOL CHEMICALS CTX

FLOCCULANTS

CTX 42 FLOCCULANT

Removes the particles from the water that turn it cloudy.

- Improves water transparency.
- Coagulant action.
- Place tablet in skimmer.

TABLET	EFFICACY	ALL TYPES OF POOLS	DOSAGE
100g	**10 DAYS**		**1 TABLET UP TO 50m³**

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 42 Flocculant	25 kg	03120	1	450	-

CTX 41 FLOCCULANT

Shock treatment that removes the particles from the water that turn it cloudy.

- Clarifies the water, restoring transparency.
- Fast-acting.
- Improves disinfectant output.

LIQUID	EFFICACY	ALL TYPES OF POOLS	DOSAGE
	8h		**100ml / 10m³**

	Format	Code	Standard Pack	Pallet weight Kg	Standard volume in m³
CTX 41 Flocculant	25 l	03118	1	600	-

WATER TREATMENT PRODUCTS

WATER TREATMENT EQUIPMENT

ASTRALPOOL

freepool²

Salt chlorinator + UV + CO$_2$

Freepool² disinfects the water thanks to the salt chlorinator and the UV and corrects pH levels by injecting CO$_2$ through the reactor

75% reduction
in the concentration of **oxidants** in the atmosphere, improving the quality of the atmosphere and reducing the smell of chlorine.

20% reduction
of **combined chloramines** in the water, reducing skin and eye irritation and respiratory complications.

100% reduction
in the addition of diluted **acids and chlorinated products**; completely avoids the need to add chlorinated products and acids.

66% reduction
in the consumption of new supplies of **water**, with savings in water and energy wherever it is installed.

FREEPOOL²

The benefits of Freepool have been backed up by two studies conducted by Universitat Autònoma de Barcelona and Hospital Universitari Clínic de Barcelona.

INTRODUCTION

Pools without chemical products that deliver unbeatable water and air quality

+ Public pool water treatment and disinfection system.
+ Freepool² keeps the quality of water to the highest standards without the need to add chemical products.
+ Freepool² is a unique product that comes with three water treatment technologies that optimize disinfection and pH levels: a low-salinity salt chlorinator for disinfecting the water, low pressure UV for reducing combined chloramines and a CO_2 injection system for adjusting the pH.

The main advantages of Freepool² are:

+ Water quality. Studies carried out by Universidad Autónoma de Barcelona and Hospital Clínic de Barcelona revealed that swimmers' perception of a "perfectly clean" atmosphere increased significantly.
+ Safety. There is no need to store, handle or measure out chemicals and it is therefore a safer system.

Technical features:

+ Chlorine output of 180 g/h
+ Three 90 W UV lamps
+ CO_2 injector and pH control kit for dosing and absorption

FREEPOOL²

ASTRALPOOL

It is essential to receive advice from Fluidra's technical department before installing the equipment.

WATER TREATMENT EQUIPMENT
SALT ELECTROLYSIS AND PH/CL CONTROL

- Water chlorinators for commercial pools are becoming popular because they are efficient, practical, safe and well priced.
- Our wide range of industrial electrolysis systems covers self-cleaning equipment of up to 600 grams/hour of Chlorine, which makes it possible to use saline electrolysis to treat the water at any public use facility.

Main advantages:

- **Safety:** There is no need to store, handle or dose any chemical products and therefore it is a much safer system. The raw material stored is common salt.
- **Savings:** The introduction of saline electrolysis systems can bring net savings in operating costs of around 50-60%, with respect to traditional systems.
- Peristaltic pump not included.

TECHNICAL FEATURES

	Easy Salt	Easy Salt Next	Pro-Chlore Salt	Nature Salt
Self-cleaning electrodes	10,000 - 12,000 h	10,000 - 12,000 h	12,000 - 15,000 h	12,000 - 15,000 h
Salinity range	5–12 g/l (recommended 5–6 g/l)	5–12 g/l (recommended 5–6 g/l)	5–12 g/l (recommended 5–6 g/l)	1.5–3 g/l (recommended: 2–2.5 g/l) (*)
Production (g/h)	50 - 180	75 - 190	50 - 600	50 - 300

(*) Operating range 1.5–5 g/l depending on the temperature (28–35 °C) and nominal output (80–100%)

EASY SALT

SELF-CLEANING salt electrolysis system for public pool applications of up to 180 g chlorine/hour. Easy Salt is a compact and cost-competitive piece of equipment. To control more than one unit for the same pool you will need an AP PR-200 external control or Control Connect and the TRI multiple control kit (code 70338).

EASY SALT NEXT

ASTRALPOOL △

Easy Salt Next is the next generarion of salt electrolysis system for public pool applications of up to 190 g chlorine/hour. Easy Salt Next has a compact and cost-competitive equipment design. Made with high-pressure (polypropylene) cells equipped with Premium+ grade electrodes (up to 12.000 hours). The device includes a display LED screen to improve the user interface. Expandable functions with 200 controllers series.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Easy Salt Next 75	72663	1	25	0.29

Calibration	(pH) Automatic; two modes Fast: one-point calibration Standard: Two-point calibration	Automatic: one-point calibration	FREE CHLORINE: automatic (one-point using external DPD calibrator – not supplied)

*Not available for Easy Salt / Easy Salt Next.

PRO-CHLORE SALT

ASTRALPOOL △

Our Pro-Chlore Salt range includes EX electrodes that provide the highest level of durability in self-cleaning systems. The Pro-Chlore Salt range with its integrated EXTENSION options (EXT-1, EXT-1E, EXT-2) or external control options (AP PR200, Control Connect) includes a control and regulation system for ORP values (Redox) or ppm, as well as pH, allowing improved management of the equipment and an excellent water quality at all times. The Pro-Chlore range can be manufactured, on request, for seawater (Pro Chlore Salt AM Series). To control more than one unit for the same pool you will need an AP PR-200 external control or Control Connect and the TRI multiple control kit (code 70338).

HELIOX UV LP / MP

ASTRALPOOL

INTRODUCTION

+ AstralPool presents Heliox UV, an automatic UVC light system, which guarantees double disinfection through a significant reduction in the amount of chloramines (bound chlorine) along with the neutralisation of bacteria, viruses and other microorganisms present in water by impeding their reproduction.
+ The range comprises the Heliox UV LP and the Heliox UV MP models for public pools.

The advantages of UV-C technology:

+ UV ray treatment systems are completely automatic, with very low maintenance and running costs. They also have considerable advantages over other systems:
+ 100% of pool water is treated.
+ The disinfected water is free of unpleasant smells and does not irritate the eyes, thanks to a drastic reduction in the amount of chloramines.
+ They save money as fewer chemical products are required.
+ They are environmentally friendly because:
  + Less fresh water is needed (daily water renewal is reduced).
  + Fewer waste by-products are formed, resulting in a reduction in subsequent water treatment.
  + The UV-C equipment does not add any chemical products to the water.

Heliox-UV operation

+ UV-C disinfection is a local treatment (UV chamber), which takes place as the water in the pool circulates through the chamber that contains the UV-C lamps.
+ The accurate delivery of radiation (W UV-C) and residence time in the system ensure the effective neutralisation of 99.9% of microorganisms, as well as the reduction of chloramines to safe levels (<0.6 ppm).

WATER
TREATMENT
EQUIPMENT

HELIOX UV MP

ASTRALPOOL

- Heliox UV MP (medium pressure) systems are designed to be used in public pools. These lamps operate over a wide spectrum to cover the whole of the UV region (see graph), which makes possible the effective eradication of chloramines (<0.6 ppm) in the pool water and its efficient disinfection due to the neutralisation of microorganisms (99.9%), including those resistant to chlorine treatment.
- More compact design (UV reactor in AISI-316).
- Adjustable to between 70 and 100% of rated power, in 1% increments, by means of a self-cooling electronic ballast.
- Fluidra technology (design and manufacturing).
- Calibrated UV-C radiation sensor (mW/cm²). Precise dose control. Instant power adjustment to process conditions. Saves energy and extends the lamp's lifetime.
- Advanced colour touch screen. System menu for browsing process parameters and log files.

Advanced versions:

- Embedded web.
- The control architecture used in Heliox UV PM systems has a number of features that make them reliable, energy-efficient and scalable to the highest possible level.
- The Heliox UV MP systems use two parameters for adjusting the power setting: average radiation and flow. All models have a rated radiation profile that ensures a dose of 60mJ/cm². If the flow is lower than the rated value, the same will apply to the required radiation level and the system reduces the power input, thus optimising power consumption and the lamp's lifetime. Likewise, if radiation drops due to losses caused by cloudy water, scaling or lamp emission efficiency, the system will adjust the power so that the right dose is supplied.

For sea water application, contact with AstralPool
Legend:

HELIOX UV LP

ASTRALPOOL

+ UV LP Stainless Steel and UV LP PE (LP = low pressure) systems are designed to be used in public pools. They act at a wavelength of 254 nm, which is ideal for eliminating microorganisms. They will enable you to benefit from the latest ultraviolet light technology in the field of water treatment.

New Features of LP S.S. & LP PE:

+ Stainless steel and polyethylene versions.
+ Multi-lamp version.
+ Fluidra technology (design and manufacturing).
+ Lamp "ON" indicator.
+ Electronic counter for working time and ignitions (lamp lifetime control).
+ Flow switch included as standard.

ACQUA DOS dosing pumps

With only 3 sizes Acqua Dos dosing pumps cover a wide range of performances, having a flow rate range from 4 to 110 l/h and a back pressure up to 16 bar. The power supply is 100 ÷ 240 Vac – 50/60 Hz therefore the same pump can operate with different supply voltage.

The pump head is in PVDF and with ceramic ball valve, giving it high chemical compatibility with several liquids, long life PTFE diaphragm.

Acqua Dos series are equipped with a manually priming pump for the start up.

The pump is furnished with a complete standard installation kit, which includes: PVDF foot filter and injection valve, PVC suction tube, PE delivery tube, wall and base fixing bracket.

Installation kit included.
ACQUA DOS MANUAL ANALOG

Acqua Dos series analogic dosing pumps with constant flow rate are manually adjustable by a knob mounted on the front panel.

The flow rate has two frequency ranges:

• 0÷20 % of max flow rate
• 0÷100% of max flow rate
Input for minimum chemical level control (not included).

		Code	Standard Pack	Standard weight in kg	Standard volume in m³

ACQUA DOS PH / ORP

ASTRALPOOL △

The Acqua Dos series digital dosing pump has a built-in pH/Redox control meter and is also compatible with the Fluidra Connect remote management system.

Other features are:

- Constant or proportional dosing according the measured pH or Redox value
- PT100 probe input for thermal compensation
- Repetition alarm relay
- Input On-Off for remote control
- 4÷20 mA output for measure transmission
- Minimum chemical level input (not included)
- Electrode not included

EXACTUS MEMBRANE

dosing pumps

ASTRALPOOL △

All systems comply with EC regulations. IP-65 protection. Electrical connection: 220/240 V 50/60 Hz. Materials in contact with the liquid: Polypropylene, Viton, Teflon and PVC. Other valve models in different materials available on request. Includes anti-acid plastic housing. Touch sensitive moisture resistant indicator. Drainage valve included. Lubrication-free, minimal maintenance. On request, the unit can be supplied with outlet, level sensor or other operating voltages.

Available materials:

Pump head: PP, and available in PVDF and PTFE to order

Diaphragm: PTFE

Valves: FPM lip valve (Viton) and other elastomers such as EPDM (Dutral), NBR (nitrile) and silicone available to order. Ceramic ball valves available.

Connections: 4 x 6 mm

Installation kit included with all pumps: full suction filter (PP-FPM by Viton), injection valve (PP-FPM by Viton), suction/return piping 2 m + 2 m PVC, 2-m PE distribution hose.

EXACTUS PROPORTIONAL

ASTRALPOOL △

Proportional pump controlled by the mA signal. The pump may be connected to a transmitter/indicator instrument or to another device that feeds in an intensity-modulated signal of 0 to 20mA. The frequency drive of the pump will be proportional to the mA signal received, i.e. the higher the signal, the greater the pump flow rate. The pump can be set to work in reverse mode, i.e. the higher the signal, the lower the flow rate. This model can be adapted for other mA rates (0-20mA, 4-20mA, 20-4mA). Product can incorporate a level sensor (sold separately).

OPTIMA DOSING PUMPS

ASTRALPOOL △

+ The OPTIMA dosing pump represents the development of more than 30 years of experience in the automatic dosing field.
+ This series reduces the number of pumps required to meet the various dosing needs.
+ The OPTIMA dosing pump series, with its power supply technology from 90, VCA to 265 VCA and at 50-60 Hz, ensures a precision and reliability never seen before.
+ Integration of many functions due to its simple programming, an alphanumeric display, the possibility of multilingual programming of the menu and a technology which permit controlled flow rate and back pressure.
+ Allows to use the same model for various applications providing a great versatility.
+ Systems manufactured in compliance with EC standards.
+ IP5 protection. 90-265V AC 50/60 Hz power supply.
+ Components in contact with chemicals are made of polypropylene, Viton, Teflon and PVC. (Other materials are available if made to order.)
+ Acid-resistant casing.
+ Moisture-resistant membrane push buttons.
+ Built-in purge valve.
+ No lubrication and little maintenance work required.
+ Sensors and calibration solutions not included.
+ Also available with a peristaltic pump (see page 234).

OPTIMA CONSTANT FLOW RATE

ASTRALPOOL △

In OPTIMA constant flow rate analogue dosing pumps, the flow rate can be set as a percentage using the potentiometer under the front panel, which modifies the pump's operation frequency.

The pumps in this range have an level inlet sensor.

Double scale adjustment: the maximum dosing frequency can be divided into 5. This double scale allows users to have two pumps with a single unit.

Power supply from 90 to 230 VCA at 50-60 Hz with plug and switch

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Adjustable manual Optima pump				
B-type pump of 5-10 bar and 2-5 l/h	57132	1	3.5	0.01
C-type pump of 5 bar and 10 l/h	57133	1	4.5	0.01
D-type pump of 5 bar and 120 l/h	57135	1	4.5	0.01

OPTIMA NEXT CONSTANT FLOW RATE

ASTRALPOOL △

The flow rate is fully adjustable from the flow meter. Power supply from 90 to 230 VCA at 50-60 Hz without plug.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Adjustable Optima manual pump **at 8 bar and 5 l/h**	66164	1	-	-

OPTIMA PROPORTIONAL

and volumetric

ASTRALPOOL △

OPTIMA pumps provide all the functions of proportional dosing in a single model.

Features:

• Proportional with analogue signals 4 - 20 mA.
• Proportional with digital signals and the possibility of:
• Multiplying the input impulses (1:n)
• Dividing the input impulses (n:1)
• Function in ppm
• The pump has a memory function for processing input impulses dosing
• Level alarm with pump disconnection.
• Maximum dosing flow rate to prevent overdosing.
• Password for protecting programmed data
• Possibility of alarm connection
• Power supply from 90 to 265 VCA at 50-60 Hz with plug

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Type B Model 7-10 bar and 5 litres	57136	1	3.5	0.01
Type C Model 5 bar and 10 litres	57137	1	4.5	0.01
Type D Model 5 bar and 20 litres	57138	1	4.5	0.01

OPTIMA NEXT PROPORTIONAL
and volumetric

ASTRALPOOL △

OPTIMA pumps provide all the functions of proportional dosing in a single model.

Features:

• Proportional with analogue signals 4 - 20 mA.
• Reading of pulses/minute.
• Chemical product minimum level inlet.
• Pulse entry for dosing proportional from pulse emitter counter.
• Remote start/stop.
• Power supply from 90 to 265 VCA at 50-60 Hz without plug.

	Code	Standard Pack	Standard weight in kg	Standard volume in m^3
Model 8 bar and 5 litres	66165	1	-	-

OPTIMA PH / REDOX

ASTRALPOOL △

OPTIMA dosing pump with built-in pH/Redox control. pH/Redox instrument.

Automatic calibration: Calibration by simply pressing a button, with the possibility of controlling the level of sensor efficiency.

Features:

• 90-265 VAC 50/60 Hz power supply
• Manual temperature compensation for pH or optionally automatic via Pt100.
• 4-20mA output for printed register or transmission of the reading.
• Level alarm with pump disconnection or simple warning of lack of product by means of the alarm relay.
• Alarm notifying deactivation of the programmable setpoint across whole of the measurement range.
• Dosing delay time to stop the dosing pump from injecting product in event of sensor malfunction.
• Maximum dosing pump flow rate for preventing overdosing.
• Password for protecting programmed data.
• Possibility of alarm connection.

FLOC SYSTEM

ASTRALPOOL

Automation flocculant dosing adjustable flow water pools. Includes: adjustable pump from 151 cm³/h until 1.5 l/h, injector valve, bottom filter, suction and return tube.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
	54528	1	1	0.0044

WOLTMAN TYPE TURBINE METERS

ASTRALPOOL

Axial turbine meter, Woltmann type, direct reading on numbered rollers. Dry dial counter, with magnetic drive. Clockwork and easily removable turbine.

Pre-equipment of pulse transmitter with plug and play system, with non-configurable pulse emitter. Meters between DN50 and DN125: 1 pulse each 100 liters and between DN150 and DN200: 1 pulse every 1000 litres. Ask for other configuration.

- No need for rectilinear sections, neither at the entrance nor at the exit of the meter. U0-D0.
- High precision in the measurement Metrology R160 horizontal position and vertical R100.
- Vacuum sealed dial(IP68).
- Cold water use 0,1 - 30°C.
- The Predator water meter can reach up to 16 bar.
- Potable water and irrigation type certificate.
- Easy installation of the pulse emitter.
- Pulse transmitter cable not included (code 71721)..

AP PR-200

Compatible with water electrolysis

ASTRALPOOL △

The expert's choice for dosing control. The built-in panels based on Series AP PR controllers provide the best solution for the plug & play devices pre-assembled on the panel. There are several versions for the control of the water's pH, ORP and FREE CHLORINE levels.

AP PR-200 equipment is compatible with the Easy Salt, Easy Salt Next, ProChlore Salt, Nature Salt and Neolysis ranges.

This is also the recommended solution for experts whenever several chlorination systems must be controlled at the same time from a single control and regulation panel (multiple control through the KIT TRI).

POOL PATROL

ASTRALPOOL △

The Colorimetric controller unit gives a reply to the demand of the Swimming Pool Market requiring compact, easy and low maintenance device, with IP65 enclosure. The available measures are: Free Chlorine (DPD1), pH, Redox (ORP), Temperature. Thanks to its internal graphic display it is possible to have all measures displayed at the same time. The Plastic Cover assures an easy accessibility to the hydraulic part.
Includes: Measuring instrument, flow detector by temperature, pH sensor, ORP sensor, pH calibration solutions, ORP calibration solutions and DPD2 bottle.

Pool Patrol	54527	1	-	-

AUTOMATIC REGULATION AND CONTROL EQUIPMENT

GUARDIAN POOL

ASTRALPOOL

+ A fully automated electronic control unit with potentiometric measurements of pH and Redox potential or an amperometric measurement selective chlorine

The new Guardian Pool unit combines traditional control and dosing elements with a total digital control of its values that facilitates the management of the pool parameters, as well as its history to analyse or detect possible errors. Guardian Pool stands out for its high performance in the control and regulation of chemical products for use in private pools and public pools. Innovative design 7" high resolution touch screen display, firmware update through its USB port, which is also used for downloading the swimming pool data, and a great feature is the WIFI communication, to control the equipment through any mobile device, tablet or PC, inside its radius of range.

Advantages:

- New intuitive and user friendly multilingual user interface.
- Depending on model, simultaneous readings of pH, ORP, Temperature, Free Chlorine, Total Chlorine, Combined Chlorine and Turbidity.
- Internal datalogger with 4Mb of memory, up to 16,000 records, with the possibility of downloading data, displaying graphs and displaying the screen at the time of data input.
- Display of alarms by parameter.
- Chlorine measurement sensor, using Sodium Hypochlorite, Dichlor, Trichlor or Salt Chlorine, with stable reading up to 500 ppm of Isocyanuric Acid.
- Possibility to use electrodes for Bromine, Peroxide, Peracetic, Ozone ....
- 2 control relays for pH and Free Chlorine parameters, powered at 230V 50/60Hz 6A.
- 1 control relay powered for ORP at 230V 50/60Hz 6A.
- 1 control relay for Temperature 230V 50/60Hz with the possibility of associating it to Total Chlorine or Combined Chlorine.
- 2 alarm relays, potential free, configurable to any measurement, including flow rate, or as a general system alarm.
- RS485 Modbus Fluidra Connect RS485 communication port.
- Electrode holder with LED lighting for failure identification.

Technical Specifications:

- Innovative design.
- 7 " touch screen (240x128 pixels backlit display).
- Modular probel holder
- Digital central with full access to all its parameters.
- Easy to use.
- For pools dosed with stabilized chlorine (solid), non-stabilized chlorine (liquid or solid), or bromine.
- Includes double relay outputs for each parameter, adjustable 4-20 mA outputs
- WiFi module with internal Webserver page settings
- Fluidra connect compatible
- Multilingual menu
- The signal inputs of the sensors are galvanically isolated.
- USB port for download parameter and Firmware upgrade function.
- Adjusting the proportional dosage on proportional pump .

CONTROLLER

ASTRALPOOL △

The panels in the CONTROLLER range are fully equipped and assembled systems. They are therefore ideal for use in water treatment.

Their simple, compact design makes installation and start-up extremely easy.

They come with all of the components and accessories required for rapid assembly. All assemblies are made of PVC sheets, in various sizes depending on the model.

General technical features

- Range of available sizes depending of the sensor selected.
- Range available for free chlorine: 0-2, 0-5 0-10, 0-20 and 0-200 ppm.
- pH range: 0–14.
- ORP range: +/-1500 mV.
- Temperature range: 0–50°C.
- Measurement of stable chlorine with low pH dependence.
- Self-calibration of all sizes.
- Alarm signal if water flow is insufficient.
- Instrument with IP65 protection rating.
- 250 V-10 A relays for connecting dosing pumps or salt chlorinators.
- 4-20 mA analogue outlets with repeat signal or manifold for proportional pumps.
- Power supply: 230 V / 50 Hz.
- Setpoints and programmable alarms.
- Pump pause function during calibration and for stopping flow.
- Temperature readings and readjustment (automatic with PT100 sensor included).
- Three types of setpoint settings. On/Off, Proportional in Time and Proportional by Pulses.
- RS485 communications port.

Components included in the assembly:

- Methacrylate sensor holder, with flow regulator, sample taking valve and flow sensor.
- Filter holder and 80 micron filter cartridge for water inlet.
- DPD calibration standard solutions.
- Assembly accessories, and instruction and installation manual.
- Sensors depending on version.

FOR WHICH TYPE OF POOLS?

Types of pools	Medium public pools (sports centers, institutional pools, hotels) with rigid walls, up to 30 m length
Pool shapes	Rectangular, oval, freeshape
All Floors	Flat, gentleslope, composite slope, diamond shape
Pool surfaces	Tiles, liner, polyester hull, reinforced PVC, painted concrete

DESCRIPTION

Cleaning areas	Floor /walls
Number / Length of cleaning cycles	Multiple with preset cycles -Floor Mode: floor -Wall and floor mode: floor walls and waterline/ -Delayed start: the 2 cleaning modes will start with 3 hours delayed
Delayed start	Yes up to 3 hours
Power supply	Autonomous, connected to 230V main supply before the transformer
Steering	Pre-programmed
Drive system	Tracks system drive -2 motors
Transmission	Belt transmission with reinforced components
Infrared sensor	Yes
Brushes	PVA
Full filter indicator	Yes
Remote control	Yes (Bluetooth®)
Filtration system / access	Dual bag filter with access under the cleaner
Units / pallet	9 / pallet

TECHNICAL SPECIFICATIONS

Number of motors	3
Control box supply	110-240 VAC ; 50 / 60 Hz
Power supply	24 VDC
Operating power	150 W
Cable length / Hose length	30 m
Cleaner size (L x W x h)	43 x 43 x 54 cm
Packaging size (L x W x h)	80 x 40 x 60 cm
Cleaner weight	9 kg
Packaging weight	22 kg
Filtering capacity	3.1 kg
Max depth	5 m
Inlet suction size / Cleaned width	40 cm

Energy efficiency

New European regulation of energy labeling for lamps and projectors

NEW ENERGY EFFICIENCY LABEL FOR LIGHTING

The European Union launches the European Regulation EU 2019/2015 on new energy efficiency labeling in lamps and projectors that starts on September 1st, 2021 and repeals the European Regulation EU 874/2012.

The new Energy Efficiency label allows:

- Providing more information to the installer and customer. Thanks to the new QR code will access the European EPREL base, where the characteristics of the product are available.

- Carrying out a new energy classification promotes evolution of lighting technology.

- Greater control of products manufactured in the EU, with the QR code.

LumiPlus HIGH EFFICIENCY WHITE LIGHT DC projectors

ASTRALPOOL
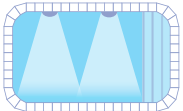

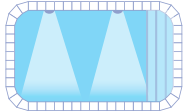

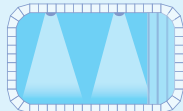

Lumiplus white light DC projectors are 24Vac.

Advantages of DC vs AC projectors:

• High energy efficiency
• Incudes power pack
• Voltage drop reduction, the section of the electrical cable can be smaller than the AC projectors
• Supplied power pack protects projectors from power surges

To complete the installation of these projectors it is needed to choose the support, that is the niche, inlet, or corresponding fixation. You will find them in page 280.

AstralPool LumiPlus is the most extensive family in the market of underwater spotlights for public, commercial and residential pools.

The entire LumiPlus range is made of high-quality LEDs and electronic components, and is manufactured entirely in the EU to European quality standards.

The AstralPool LumiPlus family delivers:

- Greater energy efficiency.

- High performance projectors with top quality lighting (TQL) technology.

- Enhanced energy efficiency in pools thanks to the use of LumiPlus DC lamps and projectors run from a direct current power source (24 V DC).

- Great control over the range with the inclusion of the Internet of Pools (IoP) concept by Fluidra Connect.

- IP68 protection rating.

- L70 50000 hours lifespan.

MADE IN EUROPE

LumiPlus Flexi & FlexiMini

The LED solution that adapts to every type of pool

The LumiPlus projectors, Flexi & FlexiMini, are characterised by their more stylish finish and their great adaptability to any type of new-build or existing pool, whether a liner or concrete pool, that can be fitted to niches on the surface or in bushings.

"AstralPool's LumiPlus Flexi & FlexiMini system delivers top flexibility"

LumiPlus Flexi
The LED solution that adapts to all types of pool

⁽¹⁾

Energy Efficient ⁽²⁾
The family of LumiPlus Flexi spotlights – FlexiNiche, FlexiSlim and FlexiRapid – is characterized by its great adaptability to any type of new-build or existing pool, whether a liner or concrete pool, that can be fitted to niches, on the surface or in bushings. The LumiPlus Flexi system delivers top flexibility.

Its configuration is carried out in two steps in new pools. You need to choose:

1. The color of the light.

2. The faceplate color that best matches your pool, between white, beige, Light grey, anthracite grey and stainless steel (this one only for the FlexiNiche version).

The FlexiNiche version with his unique system of screws can adapt to any niche from diameter 180 up to 230 mm.

FlexiSlim version is compatible with the brackets for Flat, Extraflat and Slim Projectors by AstralPool.

FlexiRapid is compatible with any bushing with 1"½ internal thread.

* Suitable to use ABS niches with Flexi ABS decorative ring.

POOL LIGHTING

PROJECTOR

LumiPlus FlexiMini
Compact design.
Maxi customization.

(1)

Energy Efficient (2)
The LumiPlus Flexi Mini projector is an underwater projector with reduced dimensions that stands out for its ease and flexibility of installation, being compatible with the Mini V2 and V3 niches, 1 "½ internal thread nozzles, 63mm or 2" cable glands, pipes D63 PN6 and PN10 or D50 PN10 pipes. Its configuration is carried out in two steps in new pools. You need to choose :

1.- The spotlight

2.- One of the 4 models of decorative ring: niche; nozzle L; nozzle S; or, for pipe or wall bushings.

The decorative ring can be made of ABS in a white, light gray, anthracite gray or beige finish; or AISI- 316L stainless steel.

The point of light is available in two powers, V1 for lighting stairs and V2 for lighting the basin, and you can choose between white, warm white and RGB multicolor light. The RGB versions are compatible with ECO, TOP, Wireless, LumiPlus LED App, ModBUS (Connect) and DMX controls (see pages 270-271).

Panels	49828	00332	27084	-
Polyester	00369	00336	74179	-

Installation accessories can be found in Pool shell equipment chapter on within lights chapter, Niches subchapter.

PROJECTOR DESIGN

ASTRALPOOL △

The LumiPlus Design projector is a high power underwater projector that can be installed in 180mm diameter niches.

The decorative ring is available in Stainless Steel effect and Pure White finishes.

The light can be white, warm white, and RGB multi-color. The RGB versions are compatible with ECO, TOP, Wireless, LumiPlus LED App, ModBUS (Connect) and DMX controls (see codes in pages 270-271).

LumiPlus monocolor white light lamps and projectors are also available in Warm White.

MADE IN EUROPE

TECHNICAL FEATURES

Light Colour		Projector Design		Consumption	Luminous flux
		White ≈	Stainless steel effect ≈		
White	D (A↑G)	59807	59805	32W (35VA)	4320 lm
RGB (NN thing)	F (A↑G)	59803	59801	32W (42VA)	2544 lm
RGB DMX	F (A↑G)	59811	59809	32W (42VA)	2544 lm

Rated voltage: 12V AC. IPX8 protection. Includes 2.5 m H07RN-F 2x1.5 mm² cable.
Adaptor kit available for other niche types from diameter 180 to 190 mm. Code: 59818. It must always be installed underwater.

NICHES FOR PROJECTOR DESIGN

TECHNICAL FEATURES

	Niches			
Concrete pool	Prefabricated pools		Fixing kit for other niches
	With inserts	Without inserts	
59813 ≈	59814	59815	59818*

Compatible with: LumiPlus FlexiNiche ABS and Stainless Steel and LumiPlus Design.
*Compatible with the majority of niches from Ø180 to Ø190 mm on the market (Hugo Lahme, MTS Producksts, Wibre…).

NN thing — Fluidra Connect-compatible

≈ Seawater-proof

LUMIPLUS MICRO PROJECTORS

Snap-in MICRO projectors

The Micro LED projector is the smallest model in the range, ideal for lighting a pool's steps and/or corners. It is available in cool white, warm white and RGB multicolor light. The multicolor versions are compatible with the ECO, TOP, LumiPlus LED app, ModBUS (Connect) and DMX controllers (see codes). There is a choice between various types of faceplate: ABS or AISI 316 stainless steel.

It is fitted to concrete pools using D 50 PN 10 piping or D 63 PN6 y D 63 PN10 piping if accessories 38818 or 38819 are used.

TECHNICAL FEATURES

Snap-in MICRO projector					
Light Color		**Type of decorative ring**		**Consumption**	**Luminous flux**
		White	**S.S.**

Rated voltage: 24 V DC. Protection rating: IPX8. Includes 220V AC - 24 V DC power pack.
Does not work with 220 V AC-12 V AC electromagnetic transformers. It must always be installed underwater.

PAR56 V2 lamp

Light Color		Code	Consumption	Luminous flux
RGB	G	43411	48W (64VA)	2544 lm
RGB DMX		45637	48W (64VA)	2544 lm

Rated voltage: 24 V DC. Protection rating: IPX8. It must always be installed underwater.

LUMIPLUS ESSENTIAL

A COMPLETE RANGE OF LEDs.
ALL YOU NEED TO LIGHT A POOL.

Like the rest of LumiPlus products, **AstralPool LumiPlus Essential** is made of high-quality LEDs and electronic components, and is manufactured entirely in the EU to European quality standards.

The AstralPool LumiPlus family delivers:

• Greater energy efficiency.

• High performance projectors with top quality lighting (TQL) technology.

• Enhanced energy efficiency in pools thanks to the use of LumiPlus lamps and projectors.

• IP68 protection rating.

CONTROL SYSTEMS

ASTRALPOOL △

System			Code	Description	Projectors
LumiPlus RGB ECO			32458	**The simplest and most economical colour change system.** LumiPlus ECO is a push-button switch that allows 14 modes of operation: 7 fixed colours and 7 different colour sequences. Each time the push button is pressed, the colour or sequence will change. By pressing for several seconds, the light is white. The push button must be sized to withstand the power consumed by the number of lights in the facility. Maximum charge 700 VA. Must be connected in the transformer primary.	Any LumiPlus RGB projector.
LumiPlus WIRELESS	LumiPlus Control Motion		59125	**Colour change CONTROL in your hand.** The LumiPlus Control Motion remote control enables wireless projector control, directly offering on/off options, 12 colour changes, 8 sequence changes and sequence speed. It also detects movement, letting you activate colours and sequences by vertical and horizontal movements, respectively. Compatible with the LumiPlus Wireless range of projectors only. Can control 2 wireless projectors and 3 in FlexiMini	Flexi (ABS body) V1 RGB Wireless PAR56 V1 RGB Wireless * Not compatible with stainless steel FlexiNiche projectors.
	LumiPlus Wireless Range Extender		64633	Allows expansion of the signal that the LumiPlus Control Motion sends to the projectors with the wireless control system. Ideal for facilities whose architectural features or projectors installation makes it hard for the LumiPlus Control Motion signal to reach the wireless projectors properly.	
LumiPlus RGB TOP			27818 + 41988	**The LumiPlus TOP system is a professional control of the color.** System comprising the 27818 modulator and 41988 remote control that enables to control a large number of projectors. The modulator has an antenna with a 50m range to receive the signal from the remote control (bought separately). The LumiPlus TOP system enables: Projector on/off action. Colour selection: 12 fixed colours available. Sequence selection: 8 sequences available. Sequence speed selection: 8 speeds available for each sequence. Supplied separately. A total of 10 LumiPlus modulators can be synchronized.	Any LumiPlus RGB projector.
LumiPlus LED APP LumiPlus WIFI	Existing installation		59131	**Control your pool lighting from your smartphone.** App to check LumiPlus lights and projectors from an Android or iOS smartphone or tablet. Enables to control your LumiPlus lights or spotlights from your smartphone or tablet. The LumiPlus app should only be installed as an additional feature to the LumiPlus Modulator. It offers a range of 12 colours and 8 sequences or colour change programs. Free app you can download directly from the following sites: Apple: www.lumiplusled-ios.astralpool.com Android: www.lumiplusled-android.astralpool.com	Any LumiPlus RGB projector
	New installation		59132		

LED LIGHTING - LUMIPLUS

CONTROL SYSTEMS

AstralPOOL △

System			Code	Description	Projectors
				Control your pool lighting anywhere, anytime.	
LumiPlus Modbus FLUIDRA CONNECT	Existing installation		57434	The Modbus protocol enables the control of the LumiPlus modulator. It can be used to switch the projectors on and off, change their colours and sequence speed and set the time for putting the projectors in sleep mode. Download the Fluidra Connect app for instant information about the state of your pool 365 days a year. Fluidra Direct is peace of mind, comfort and leisure. In addition to controlling projectors, LumiPlus lets you control the filtration, water treatment and more of your pool through the Modbus protocol. The LumiPlus Modbus should only be installed as an additional feature to the LumiPlus 27818 modulator for correct installation and operation.	Any LumiPlus RGB projector
	New installation		57435		
LumiPlus RGB DMX				**Design lighting scenes for fountains and large aquatic spaces**	LumiPlus RGB-DMX projector
	RGB DMX Modulator		41107	DMX LED projector modulator/12V AC. DMX receiver for the Flexi, PAR56, S-LIM and Design ranges. Receiving orders from the DMX controller (Astral DMX 74099 or Astral DMX Pro 74500) via the DMX bus and acting on the projectors that are connected.	
	RGB-DMX power pack		52142	Product designed exclusively for use with V2 and V3 Mini LED and RGB DMX Micro projectors. The power pack can control up to 9 projectors, receiving orders from the system's DMX controller (Astral DMX 74099 or Astral DMX Pro 74500) via the DMX bus and acting on the projectors that are connected. The power pack has been designed to be used solely with DMX protocol and 24V DC DMX controllable parts from AstralPool.	
	DMX controller		74099	LumiPlus DMX System makes it possible to control lights individually or by groups. Users will have easy and intuitive full control over a projector or group of projectors. Main advantages / benefits: Very accurate control over the lights: colour and dimming. Plug and play. Projectors can be operated independently or combined. Allows creating new light scenes. LumiPlus DMX system does not require any additional wiring for projectors. Smartphone or tablet control via an app.	
	DMX PRO controller		74100		

OTHER LED SOLUTIONS:

PAR56 projectors, PAR56 lamps and Flat projectors

AQUA SPHERE

PAR56 projectors

MADE IN EUROPE

PAR56 underwater lamp, improves energy efficiency compared to the traditional 300 W halogen PAR56 lamps. It must always be installed completely submerged. The lamps PAR56 are directly retrofittable with halogen 300 W lamps / projectors.

Lifespan of 25000 h.

The RGB lamp is controlled by a remote control, which is included, with a 2 m range and can control 2 lamps. The White lamp does not include remote control.

To correctly light a pool it is advisable to install a light from this range every 15 m² of water surface.

Note: this recommendation applies to pools light in color with white light spotlights, but if there are RGB spotlights more should be fitted. In dark pools it is recommended to use more projectors per m².

Projectors PAR56 needs a niche (see page 280) to complete the installation. Projector Flat to wall installations is delivered with the accessory to install in concrete and polyester pools. To complete the installation in panel pools needs spare part kit 24765-0500.

How to replace a PAR 56 lamp?

POOL LIGHTING

NL NICHELESS LED LIGHTS

EASY-TO-INSTALL, ECO-FRIENDLY LIGHTING

Pool lighting is an essential asset for enhancing your pool.
Zodiac® NL LED lights enable you to achieve this and they are both **energy saving and easy to install.**
They are installed during the construction stage and enhance all pool types, **using innovative, obstruction-free technology.**

> LED LIGHTING: AN ENERGY-SAVING INNOVATION

Energy efficient: powerful lighting with an **energy saving of up to 90%** (compared to incandescent or halogen spotlights).

Long lasting: they last up to 10 times longer than traditional incandescent light bulbs.

Higher performance lighting > **ENERGY SAVING 90%**

1 classic spotlight
Total consumption: 300 W
Annual cost = €37

Calculation based on 4h/day Use throughout the season (6 months) at a price of €0.1694 / kWh (average price witn VAT in France)

3 12 W NL LED lights
Total consumption: 27 W
Annual cost = 9 €
> "NICHELESS" INSTALLATION: INSTALLED ANYWHERE, QUICKLY AND EASILY!

Quickly & easily: With Zodiac® NL LED lights, there's no need to build a niche, they slot directly into a standard 1.5" wall fitting and are compatible with all pool surfaces (liner/PVC, concrete, polyester, etc.).

Compact: They integrate perfectly into the pool, adding to its aesthetic appeal and are compatible with all pool cleaners (no obstructions jutting out from the wall).

iAquaLink™ COMPATIBLE

Simple to use: 100% compatible with Zodiac® AquaLink® TRi automation and eXO® iQ smart salt water chlorinators (LS and standard versions) and Hydroxinator® iQ, NL LED lights can be controlled from your smartphone via the iAquaLink™ app.

DID YOU KNOW?

WITH RGBW LED, THERE'S NO NEED TO CHOOSE BETWEEN WHITE AND COLOR!
Zodiac® NL LED lights are innovative, using RGBW technology (Red-Green-Blue-White) to add white to all 3 primary colors.
This enables you to generate an infinite color pallet, with a more natural shade, or pure white lighting.

HALOGEN LIGHTING

LAMPS

AstralPOOL

TECHNICAL FEATURES

Lamps for lights			
Type of lamp		**Code**	**Consumption**
Halogen PAR56	For lights with niche	00370	300W (12 V)
Dichroic GX-5.3	For mini lights	19334	50W (12 V)

STANDARD LIGHT

AstralPOOL

All plastic materials. PAR56 300W 12V AC halogen lamp.

For correct pool lighting, we recommend: one projector per 25-30 m^2 of pool area. This recommendation is valid for light coloured pools. For pools in dark colours or stainless steel, we recommend a higher proportion of projectors per m^2.

The projector must be always be submerged in water.

Projectors for installation in "standard" niche (included).

TECHNICAL FEATURES

		Standard light

Rated voltage: 12 V AC. Protection rating: IPX8. Compatible with standard niches (included).

HALOGEN LIGHTING

MINI LIGHT

ASTRALPOOL △

Small underwater projector. GX-5.3 50W 12V AC aluminized halogen lamp.

For correct pool lighting, we recommend one projector per 10 m² of pool area. This recommendation is valid for light coloured pools. For pools in dark colours or stainless steel, we recommend a higher proportion of projectors per m².

The projector must be always be submerged in water.

Projectors for installation in bushings or niche, depending on model (not included). To complete the installation the right housing should be purchased for each type of pool (see page 280). This recommendation is valid for light coloured pools. For pools in dark colours or stainless steel, we recommend a higher proportion of projectors per m².

RENOLIT ALKORPLAN
CERAMICS

ALKORPLAN CERAMICS reinforced membrane

ALKORPLAN CERAMICS is a reinforced 2-mm embossed membrane for pools that imitates the volume of real glass tiling and its joints to look like a mosaic inspired in Greek mythology. Length: 21 m.

• Watertightness guaranteed.
• Quick to fit in comparison with glass tiling.
• The ceramic pieces on ALKORPLAN CERAMICS do not fall off.
• Minimum maintenance.
• More resistant and long-lasting thanks to its 2-mm thickness.
• Embossed coating that makes it look like real glass tiling.

RENOLIT ALKORPLAN
XTREME
Pools that stand up to anything!!

NOT TOXIC PRODUCT
Healthier ... Less smoke

COMPATIBLE WITH PLANTS & FISH
ALKORPLAN XTREME membrane

ALKORPLAN XTREME is the only reinforced membrane in the market whose colour is resistant to chlorine and stains, even those that usually form on the waterline.

ALKORPLAN XTREME is a smooth, flexible and robust reinforced membrane, thanks to the most advanced technological developments, and it has been made to resist the wear and tear inherent to the daily use of a pool. It is even resistant if there is a continuous large influx of swimmers in a pool and aggressive chemical products are used to treat it.

For more pool shell elements dediecated to liner pools, see chapter pool shell equipment.

PVC LAMINATE

Particularly suitable for fixing reinforced membrane in existing pools for renovation or for pools. where the horizontal surfaces are uneven or have irregularities.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
PVC laminate (1.4mm thickness x 5cm width x 2m length)	58942	-	-	-

LAMINATE 90° ANGLE PROFILE

A Fixing with a 90° angle, suitable for new pools where the coping has not been fixed or for renovations where the crown can be removed and its upper surface of the pool structure is completely smooth.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Laminate 90° angle profile (1.4mm thickness x 4.5x4.5cm width x 2m length)	58944FE	-	-	-

LAMINATE

Ideal for pools with irregular shapes where the installer can design their own profiles with the angle and size required.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Laminate (1.4mm thickness, 1cm width x 2m length)	56307	-	-	-

BEAD RECEIVER TRACK

50mm white PVC or aluminium profile in piece of 2 m. Suitable for both new pools and renovations, with the possibility of adapting to straight sections as well as curved sections.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
PVC profile (5cm width x 2m length)	74762	-	-	-
Aluminium profile (5cm width x 2m length)	74982	-	-	-

74762

74982

6 MM LOCKING BEAD

Beading to lock the reinforced membrane anchorage when the hung system is used. It also has an aesthetic finishing function.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Locking bead. White colour (6 mm width x 50m lenght)	8GAYLLOW	-	-	-

PLATE BAND for liners 150/100°

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Galvanized plate band (2 x 0.05 m)	32324	-	-	-

Note: In the event of assembling a liner 150/100° by hung type fastening with an 8 mm strip, the accessories are the same as for liners 75/100° (see next page).

32324

RIVETS

Aluminium rivets.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
25 x 4.8 mm	53795	3	8.0	0.01

DOUBLE PVC HEM

Welded to the edge of the liner, allows the liner to attach to the pool shell, by using the corresponding profile.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
	12184	250 m	9.0	0.036

ALKORCLEAN WATERLINE

degreaser and ALKORPLUS stain remover

The ALKORCLEAN degreaser is recommended for removing grease from the waterline, while the ALKORPLUS stain remover neutralises metal ions in the water such as copper.

The ALKORPLUS stain remover is a liquid to prevent stains by preventing dirt forming on the waterline.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
ALKORCLEAN waterline degreaser	55976	-	-	-
Alkorplus stain remover	53898	-	-	-

RENOLIT ALKORPLUS

Structure Disinfectant

An effective product for cleaning and disinfecting the structure prior to installing the lining, preventing the proliferation of microorganisms between the ground and the liner and, therefore, the appearance of irreversible stains. Transparent.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Pool Shell Disinfectant. 1L Transparent	53890	6	-	-

RENOLIT ALKORPLUS THF Solvent

THF (Tetrahydrofuran) is a solvent normally used to reduce the viscosity of liquid PVC or sealing lacquer. These products leave the factory with the correct viscosity, but since they are manufactured using volatile solvents, over time their viscosity increases. To reduce it, a small quantity if THF is added in the polyethylene bottle that the sealant contains. It can also be used as a PVC accessory cleaner (tubes, piping, etc.), before the application of the specific PVC glue.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
THF solvent. 1L Transparent	64312	6	-	-

RENOLIT ALKORPLUS MEC Solvent

MEC (Methyl ethyl ketone or Butanone) is a solvent used commonly to reduce the viscosity of sealants manufactured with the same MEK solvent. These products leave the factory with the correct viscosity, but as they are manufactured based on volatile solvents, their viscosity increases over time. To reduce it, add a small amount of MEK to the polyethylene bottle containing the sealant. This product is suitable for 81022 (XTREME), 81023 (TOUCH) and 81024 sealants.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
MEC solvent. 1L Transparent	74450	6	-	-

RENOLIT ALKORGLUE

Neoprene-based contact glue

The RENOLIT ALKORGLUE 81045 glue is a neoprene based contact adhesive. It is toluene-free and environmentally friendly. It will form a prefect bond between ALKORPLAN pool liner membrane, and geotextile 81006 to metal, wood, rigid PVC, concrete and other surfaces. It is not suitable for use in contact with expanded polyestyrene.

	Code	Standard Pack
5 L Yellowish colour	70679	1
20 L Yellowish colour	74981	1

RENOLIT ALKORGLUE Zero solvents

Multipurpose glue free of organic solvents suitable for not damaging sensitive materials like geotextile fleece or polystyrene. Thanks to being in an aqueous suspension, it can be used as a wet, semi-wet or contact glue. It is non-flammable.

	Code	Standard Pack
20 L Beige colour	74465	1

RENOLIT ALKORGLUE

Nitrile Rubber based thermo-adhesive

RENOLIT ALKORGLUE is a toluene-free, Nitrile Rubber based glue. The volatile solvent make is quick-drying and it has high resistance to water, ageing and plasticisers. These factors make it especially suitable for mounting the membrane on cement and mortar, and on stairs and corners even when damp. It has the added advantage of being reactivated by a hot-air welder, for those occasions when the membrane has been left open for long periods.

	Code	Standard Pack
Quick-drying glue. 20 L Beige colour	53891	1

JOINT SEALANT Application Bottle

	Code	Standard Pack
Dosing cap	53893	1
Joint sealant application bottle	53892	1

POOL LINING MATERIAL

LINERS FOR STAIRS

- Below we provide you with the details of the shapes and models you can choose from plain or printed liners to ensure you select the correct liner for your pool steps.
- Steps that are fitted along the breadth of the basin are invoiced in accordance with the standard model STRAIGHT as long as the width does not exceed 4 meters.
- Attention: the size of the basin should not include the depth of the steps.

STANDARD STEPS

Even depth of steps

Even steps

Right angles

Even riser height (only the base riser may be different in height)

NON STANDARD STEPS

If the depth of steps is uneven

Riser height is uneven

Sloping steps

Round angle
For steps that do not fit the Standard models shown here, request quote.

CONDITIONS FOR ACCEPTING AN ORDER

Note: The colours shown in the catalogue are approximate

Order:

All orders or enquiries for modifying orders must be made in writing.
For avoiding any delay, the client, at his own risk, must forward the supplier all the necessary liner measurements for executing the work. In case the information supplied by the client is insufficient, he will have to supply the missing information ahead of the manufacturing time.

Implicit data:

If the following information is not supplied in writing with the order, we shall consider the below mentioned data for the liner manufacture:
* Vertical radii of 15 cm.
* Horizontal radii of a maximum of 5 cm (in the pool shell only). Hung-type fastening system.
* The horizontal measurements taken from the pool shell.
* The depth measurements taken from the lower part of the pool's coping stone to the base of the wall.
* The diagonal measurements taken of the right angles, not of the radii.

To avoid certain misunderstandings, we suggest you take the following precautions:

For holding the liner:

* Specify the type (hung, overlap or V-fasteners); we anticipate that an additional 15 cm of material will be required for the walls if the overlap fastening system is used.

For steps:
* Check whether the angles between the step tread and rise (flat and vertical step surfaces) are truly rectilinear.
* Installation of a discharge nozzle in the middle of the first step is highly recommended for holding the liner in place.
* At least 30 cm of water should be left in the pool for maintaining the first step.
* Avoid designing staircases having more than 5 steps.
* To confirm dimensions, give the lengths of each step.
* Check the verticality of pool walls. In case of deficient plumbness, enquire about the order viability.
* Compound inclination safety ledges should be avoided on the liner.

Taking measurements:

Provide the total lengths and widths.
* All heights of the pool shell.
* Width of the safety step on each side.
* Specify the peripheral size of each side.
* Provide the measurements of each corner and slope.
* All dimensions should be provided with horizontal and/or vertical measurements.

If angles are not straight:

* Measure all of the diagonals from a single point.
* The diagonals of the right angles are only required for irregular shaped pools without right angles.
Calculation of arcs of circles:

* The arcs of circles are calculated by their radius.
* If the radius has not been calculated, a template must be used or the triangulation must be calculated to specify it.
* Ellipses are calculated using templates (or a grid plan made at intervals of approximately 1 m).

Sectional views:

* Three views are recommended: a top view, a front view and a side view.

Templates:

* Make templates for the sky and water sides (or one view).
* Templates are made for the pool's shell or cover.
Shuttering:

* Specify the measurements of the shuttering as shown in the diagram.
* Check that the inside vertical angles of the shutterings are straight.
* Check that vertical pool shell angles shuttering are in a straight line.
* Check that the horizontal angle of the wall and shuttering are in a straight line.

LINER AND GLASS TILES ACCESSORY

HYDRONET

AstralPOOL

Is a cementitious , single component mortar that protects and waterproofs all types of brick, concrete and mortar joints from water and humidity. Formulated with hydraulic cements and modified with polymers. Resistant to freeze-thaw cycles and to contact with chlorinated water. Membrane suitable for contact with drinking water.

Sealing product suitable for pools made with Mosaic or ceramic and liner.

DEHUMIDIFICATION

ASTRAL POOL®

ZODIAC®

HYGRO CONTROL

ZODIAC®

Simple dehumidification

Hygro Control is a hygro-thermostat designed exclusively by Zodiac® **for easy and intuitive control of the dehumidification equipment.**

REFERENCE POINT
Find Zodiac® dehumidification products equipped with the Hygro Control function by locating this pictogram in the catalogue.

> HOW DOES IT WORK?

Hygro Control is an accurate and easy to use digital control unit for **setting the desired relative humidity.** Relative humidity characterises the moisture in the air, specifically the quantity of water present as gas in the air in the room or conservatory housing the pool.

If the dehumidifier is fitted with the 'heating' option, Hygro Control can also set the room air temperature.

The unit is supplied with CAE, DF and OMEGA dehumidifiers. Mounted on the wall, it is connected to the dehumidifier.

Air temperature setting   **Relative humidity setting**   **Dehumidifier**
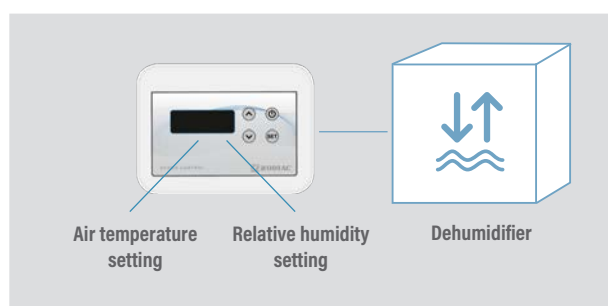

DEHUMIDIFIERS

HYGRO CONTROL

ZODIAC®

STANDARD INSTALLATION

- Hygro Control should be installed at least 50cm from the outlet
- Do not put it above the system (SIROCCO) or above an outlet grille (CAE, DF, OMEGA)
- It should be at least 1.5m from the floor

0.5m (minimum distance)

*minimum distance

INSTALLATION

• Installation in a technical room nearby the pool hall.
• Damp air extractor frame on the rear face for connection to wall or ceiling extractor duct.
• Hot, dry air blower either under or over the system for direct assembly on buried ducts or ceiling service area ducts.
• Simplified aeraulic assembly with very little load loss making it possible to keep the available ventilator pressure for the duct network.
• Hot water coil or extra electric heating fitted inside the system (see options).
• A remote regulator box, temperature sensor and humidity sensor in a duct and box enable you to adjust the operation of one unit or two dehumidifier units.

BDP CONFORT Dehumidifying Unit

ASTRALPOOL △

The BDP Confort dehumidifying unit is used for the dehumidification of indoor pools, using the latent heat of evaporation and the performance of the system itself to heat the pool water and the room air.

The energy savings achieved with these systems compared to traditional heating systems mean that they are virtually essential when you wish to heat an indoor pool.The wide range of models covers all market requirements.

- Made of non-corrosive magnesium coated aluminium.
- Thermal-acoustic inside insulation.
- Direct transmission single centrifugal ventilator. Radial Ventilator Optional.
- Air filter can be changed for a G4 type filter.
- Condensation collection gutter with drainpipe.
- A copper nitrogen, dehydrated and deoxidized refrigerated circuit. Air condensation.
- R407C refrigerant gas.
- Evaporation, condensation and hot water batteries made of copper pipes with lacquered aluminium fins (specially designed for corrosive environments).
- Airtight compressor mounted on anti-vibration mounts.
- Pressure balancing expansion valve.
- High and low pressure switch.
- General security switch.
- Power source, compressor and ventilator motor protection mechanisms.
- Full adjustment of all the items included.
- Three-way valves and their regulation when a hot water coil is incorporated.

OPTIONAL

- 1 or 2 stage electric heating option to support air heating.
- Hot water coil to support air heating, with three-way valve, temperature probe and regulation (ask about primary temperatures different to standard equipment).
- Can be supplied with power frequency at 60 Hz on request.

GENERATION OPERATING CONDITIONS

The thermo-hygrometric conditions for these facilities that are considered optimal for materials and people include:

- Air 28°C - 30°C
- 65% HR
- Water 2°C below air temperature.

DEHUMIDIFIERS

AIRPOOL

ASTRALPOOL

The AIRPOOL dehumidifier is used for the dehumidification of indoor swimming pools, taking advantage of the latent heat of vaporization and the equipment's own performance by heating the pool water and ambient air, recovering the necessary energy, and controlling the air temperature and relative humidity.

Dehumidification systems are installed in technical rooms and require ventilation ducts for a correct air distribution. In many cases, the space available is limited and it is difficult to find an equipment that fits, and each installation has its own particular features and needs, which is why Airpool dehumidifiers are calculated and designed as a tailor-made solution. Astralpool's technical team is responsible for adapting the equipment in terms of power, performance and the location of air inlets and outlets to meet the specific needs of each installation.

The aim is always to achieve the highest user comfort, better equipment performance, energy savings and compliance with the specific regulations required.

The smaller powers of the Airpool dehumidifiers are available in vertical orientation to reduce their footprint and ease their integration in technical rooms.

Dehumidification can be achieved in two ways: by freecooling or by freecooling plus refrigerant circuit.

Freecooling:
The opening of the freecooling dampers will be controlled by regulation to obtain the optimum solution; it may be the case that the dampers are kept in the minimum opening position.

Part of the air extracted from the enclosure is expelled to the outside and the same flow of new air is added, which joins the other part of the extracted air in the mixing chamber. This extracted air is regulated by the freecooling dampers.

If the air conditions in the mixing chamber already have a specific humidity with a difference compared to that extracted that guarantees the required dehumidification, it will not be necessary to start the compressor of the refrigeration circuit, which means a saving.

Freecooling and refrigerant circuit:

When the air in the mixing chamber does not have low specific humidity enough to achieve the required dehumidification, the refrigeration circuit will be started.

The nominal flow rate at the outlet of the mixing chamber is passed to the refrigeration circuit where the rest of the required dehumidification is produced as it passes through the evaporator coil.

Benefits of choosing the optional heat recovery unit:
Air renewal: Thanks to the fan system, the humid indoor air is treated and sent outdoors, thus facilitating the renewal and cleaning of the air through filters.

Air conditioning: The recuperator provides heat from the indoor air to the cold air coming from outside, thus heating the air and contributing to the climatization of the room.

Energy saving: When heat exchange takes place between the two flows, the air is heated without consuming more energy, using heat that would otherwise be wasted.

AIRPOOL

ASTRALPOOL △

STRUCTURE

- The structure is made from aluminium profiles with reinforced nylon on the corners.
- The housing is a 25 mm sandwich panel with IDROTEC polyurethane and auto-close handles, classifying the equipment as tightness L1(M) and thermal transmission T2.
- Condensation collection gutter with drainpipe.

COOLING CIRCUIT

- Evaporation and condensation battery made out of copper pipes with lacquered aluminium fins.
- Scroll compressor.
- R-410A refrigerant gas.

AIR CIRCUIT

- G4 filter.
- Free-cooling system made up of three motorized weir flaps, mixing chamber and return fan.

REGULATORS

- Through a programmable electronic regulator.
- Return air and outside air humidity and temperature probes, and a pool water temperature probe.
- Dirty filter pressure switches.
- Control of the pool water circulation pump through a voltage-free contact.
- Free-cooling weir flap servomotors.

OPTIONAL

- Harnesses the energy in the air discharged from the high-performance crossflow recuperator (according to Spain's RITE Regulation for Thermal Installations in Buildings).
- High-performance backup hot water coil manufactured in copper piping and lacquered aluminium fins specially designed for corrosive atmospheres. Includes a 3-way proportional valve. Controls flow temperature as an optional extra.
- Titanium condensers with PVC shell and Titanium coil.
- M6 filter in pool air suction unit and exterior air inlet and F8 filter in flow unit.
- Siemens regulation with touchscreen, enthalpy control and Eco operating mode, reducing fan flow in line with setpoints.
- Electronic radial plug fan with flow rate control.
- Water-water exchanger, assembled with the water condenser as a series feature.
- Increased air and pressure flow available in fans.
- External condenser.
- Weatherproofed.
- Optional CO_2 probes for controlling the quality of the air and adjusting it.
- Remote management.
- AND/OR preventive maintenance.
- AND/OR warranty extension.
- Start-up.
- Can be supplied with power frequency at 60 Hz on request.

DEHUMIDIFIERS

AIRPOOL+

ASTRALPOOL

The new high performance Airpool+ dehumidifier is used for the dehumidification of indoor pools. Thanks to its design, in which the cooling circuit's components are arranged differently than in a conventional dehumidifier, the dehumidified air is reused by a recuperator, which significantly increases performance.

The free cooling system serves a dual purpose:

The first is its capacity for renewing air so that users breathe in the best quality of air possible and the second is to take advantage of outdoor conditions for dehumidifying, thus reducing the unit's consumption. This free cooling system regulates itself according to relative outdoor and indoor humidity, and the default value.

Users can set the times the unit works. In night-time mode, conditions are less restrictive than in daytime mode as there is nobody in the pool, so settings are read to dehumidify it but not to regulate air quality.

The Airpool+ dehumidifier has five operating modes:

Mode 1 Recirculation

This operating mode is for night-time only. The return flow rate fulfils all night-time default conditions required, so the cooling cycle does not have to be switched on and all of the water is recirculated. Users can set the fan speed to keep power consumption and noise down to a minimum.

Mode 2 Alpha cycle

The return conditions measured show that the pool should be dehumidified, so the cooling cycle starts up without any outdoor air being fed into it.

This operating mode can only be run at night-time.

Mode 3 Outdoor air

In this operating mode, the unit is able to reach the desired return conditions thanks to the regulation of weir flaps. As the flow rate of outdoor air very often results in energy savings, outdoor conditions help bring down the humidity in the pool area and just a small inflow of heat can be enough to reach the desired temperature if the set return temperature has not been reached.

Mode 4 Alpha cycle + outdoor air

This operating mode should be used when the inflow of outdoor air is unable to reach the desired conditions. This does not mean that the weir flaps on the free cooling system close to keep the flow rate to a minimum as the regulation system used ensures that the flaps open to the optimum position to make the most of the outdoor air.

Mode 5 Cooling

Without exterior condenser or water condenser

The unit's free cooling system will endeavor to reach the conditions selected by the user as well as keeping to IAQ standards. The by-pass valve on the recuperator is used to make the most of outdoor conditions.

With exterior condenser

This optional feature is recommended for facilities in areas with high humidity and high temperatures. As this feature is built into the unit, no additional installation is required. It expels excess heat outdoors and feeds cool, dry air into the pool.

With water condenser

When temperatures in a pool facility rise above the default temperature, warm air will no longer be fed into it. However, it may still be necessary to dehumidify the air but as the outdoor air cannot be used to do so the cooling cycle will start to run and instead of condensing the air, both the air and water will be condensed.
Mode 1 Recirculation

Mode 2 Alpha cycle

Mode 3 Outdoor air

Mode 4 Alpha cycle + outdoor air

AIRPOOL+

ASTRALPOOL △

STRUCTURE

- The structure is made from aluminium profiles with reinforced nylon on the corners.
- The housing is a 45 mm sandwich panel with IDROTEC polyurethane and auto-close handles, classifying the equipment as tightness L1(M) and thermal transmission T2.
- Condensation collection gutter with drainpipe.
- Equipment interior with painted sheet metal for greater durability against chlorine degradation.

COOLING CIRCUIT

- High-performance evaporation and condensation batteries manufactured in copper piping and lacquered aluminium fins.
- Scroll compressor.
- R-410A refrigerant gas.

AIR CIRCUIT

- M6 filter in pool air suction unit and exterior air inlet and F8 filter in flow unit.
- Radial plug fans with flow rate control.
- Free-cooling system made up of three motorized weir flaps, mixing chamber and return fan.
- Harnesses the energy in the air discharged from the crossflow recuperator from 100% of flow.
- Back-up water heating battery. With three-way proportional valve and flow-rate temperature control.

REGULATORS

- Siemens regulation with touchscreen, absolute humidity control and Eco operating mode, reducing fan flow in line with setpoints.
- Return air and outside air humidity and temperature probes, and a pool water temperature probe.
- Dirty filter pressure switches.
- Control of the pool water circulation pump through a voltage-free contact.
- Servomotors for free-cooling weirs.

OPTIONAL

- Increase in air flow rate (involves rise in heating battery power).
- Titanium condensers with PVC shell and Titanium coil.
- Water-water exchanger, assembled with the water condenser as a series feature.
- Equipment can be operated in reverse to expel surplus heat from the facility.
- Weatherproofed.
- Optional CO_2 probes for controlling the quality of the air and adjusting it.
- ModBus.
- Remote management.
- AND/OR preventive maintenance.
- AND/OR warranty extension.
- Start-up.
- Can be supplied with power frequency at 60 Hz on request.

DEHUMIDIFIERS

OPTIONAL U.V. disinfection system

Optional U.V. disinfection system, is a highly effective way to destroy microorganisms including: virus, bacteria, and mold spores.

Short wave UV light (UVC) penetrates the cell structure of the micro-organism and destroys the DNA structure and thereby prevents it from replicating.

This method of purification is ideal for dehumidifiers because it is completely safe, fast and easy to use and with simple maintenance.

The versatility of this disinfection system makes it easy to install in different parts of the dehumidifier. This is a taylor-made option that we study its location in each dehumidifier.

ZODIAC

PARAMETERS FOR CHOOSING A HEATING SYSTEM

To define a system suitable for a pool, many parameters need to be considered. The most important parameters (but non-exhaustive) are the ones below:

1. Average outdoor air temperature (°C)

2. Pool water target temperature (in °C)

3. Period of use

4. Pool volume (m³)

5. Presence of an isothermal cover or not

6. Filtration time

To consider all the parameters which impact the sizing of a heating system, online AstralPool configurators are available:

• For professional use, visit our Profluidra website.

• For public use, visit our simplified configurator on AstralPool website.

The choice of heating equipment also depends on the energy source that will be used.

UNDERSTAND THE CONCEPT OF PERFORMANCE

To compare the performance of different heat pumps, it is essential to compare restituted power and performance coefficient.

Two main values characterise the performance of heat pumps: their power and their performance coefficient.

• **Power**, expressed in kW, indicates the quantity of heat transferred to the water.
It is expressed in specific climatic conditions to which the heat pump is exposed during use:
  - Temperature of the outside air (in °C)
  - Humidity of the outside air (in %)
  - Temperature of the water in the pool (in °C)

• **The coefficient of performance (COP)** is the ratio between the restituted power and the power consumption of the heat pump. As a result, it is the ratio at specific climatic conditions too.

As an example, a performance coefficient of 5 means that for 1 kWh consumed at the electricity meter, the heat supplies 5 times more energy to the water in the pool, or 5 kWh.

So the higher the performance coefficient, the more efficient the system.

PROHEAT II

ASTRALPOOL

- 0°C minimum outdoor air temperature.
- 2 models: Standard and Chiller.
- Digital display.
- Heating priority mode (filtration pump control).
- Robust, lightweight casing made from corrosion-resistant magnesium coated aluminium.
- Axial ventilator.
- Automatic cooling mode for chiller model.
- Automatic defrosting.
- HP & LP safety pressure switch.
- Water flow switch.
- G2 Titanium water exchanger condensers. Guaranteed against corrosion.
- Scroll compressor.
- Thermostatic expansion valve, with external balancing unit.
- High performance evaporator battery in an inner corrugated copper tube with lacquered aluminium fins, especially for corrosive environments.
- Control of purifying system.
- Automatic electrical protections.
- Can be supplied with power frequency at 60 Hz on request.

ALASKA - SIBERIA

ASTRALPOOL △

ALASKA

SIBERIA

R407C

PROFESSIONAL ADVICE RECOMMENDED

- +5°C minimum outdoor air temperature.
- 2 compact models: For outdoor (Alaska) or indoor (Siberia) installation.
- Digital display.
- Heating priority (filtration pump control).
- Made of non-corrosive magnesium coated aluminium.
- Helicoidal ventilators with direct coupling motor for the Alaska model, centrifugal for the Siberia model.
- Defrosting thermostat in evaporator for enhanced performance.
- HP & LP safety pressure switch.
- Water flow switch.
- Condensor made of copper pipe with coated aluminium fins (special for corrosive environments).
- Scroll compressor with carter resistance and deoxidized copper.
- Thermostatic expansion valve.
- Titanium evaporator with PVC shell and in G2 titanium coil according to ASTM B 338.99 standard. Guaranteed against corrosion.
- Anti-acid dehydrating filter.

WATER TO WATER CHILLER

BERING CHILLER

- The ASTRALPOOL models BERING CHILLER are used for cooling the pool, cold water sinks.
- 8 °C minimum evaporator inlet temperature.
- 40 °C maximum evaporator inlet temperature.
- Robust and lightweight designed for installation in outdoor areas.
- Digital display.
- Cooling priority (filtration pump control).
- Made of non-corrosive magnesium coated aluminum.
- Scroll compressor with carter resistor.
- Water evaporator and condenser made in PVC and Titanium.
- HP & LP safety pressure switch.
- Thermostatic expansion valve with external balancing unit.
- Hydraulic circuit with flow switch on the water inlet made of high molecular weight PVC pipe, good elasticity and remarkable resistance to stress cracking.
- Anti-acid dehydrating filter.
- Can be supplied with power frequency at 60 Hz on request.

COMPATIBLE NN thing ®

Fluidra Connect compatible

RE/I

ZODIAC

+ Full digital regulation
+ 2-stage power management
+ Maximum robustness

- Control box with precision thermostat ±0.5°C
- Digital display and timer
- Positive safety high temperature limiters
- Watertightness of electrical resistances with an EPDM collar
- HYPALON electric connection
- Flow switch
- Power contactors
- Luminous control switches
- U format allowing an easy assembly and water retention
- Factory installed power modulation (2 manual stages)
- Three-phase wiring 400V-50/60Hz only

2 YEAR WARRANTY

INSTALLATION

- In-line hydraulic connection with two PVC unions, Ø63 (RE/I 30 à 48), or two flanges, DN80 (RE/I 60 à 120).
- Supports any flow direction: just turn the flow switch and reverse the control and safety sensors.
- Plan on installing a by-pass if the filter pump flow is greater than 50m³
RE/I medium power (RE/I 30 to 48)

RE/I high power (RE/I 60 to 120)
COMMERCIAL ELECTRICHEAT (incoloy version)

ASTRALPOOL

Commercial electricheat is suitable to heat the water temperature from small to large collective pools.

• Positive safety high temperature limiter (60°C).
• Digital display.
• Flow switch.
• Power contactors.
• Temperature control thermostat from 0 to 40°C.
• Precision thermostat: 0.1°C.

CLIMATE ZONES

This table is a sizing help tool. It is given for a private pool, from 15th May to 15th September, depth 1.5m, with a maximum temperature rise time of 4 days to heat the pool from 15°C to 28°C, 14h filtration time. Climatic zones details can be found in the introduction pages of the Heating chapter p. 311
To get a customized sizing, please consult the web configurators:

HEAT EXCHANGERS

WATERHEAT EVO

Heat exchanger suitable for warming the water temperature of pools and SPAS, thanks to the heat exchange between the primary circuit (warm area) and a secondary one (cold area that we want to warm).

- Titanium housing (secondary, pool water).
- Titanium coil (primary, water for boiler).
- Primary working pressure of 10 bar.
- Secondary working pressure of 3 bar.

ETNA

ASTRALPOOL

- Corrugated plates in AISI-316 or titanium.
- EPDM gaskets.
- Housing in epoxy painted carbon steel.
- In non-equipped heat exchangers, AISI-316 stainless steel connections in ISO G2 direct thread.
- In equipped heat exchangers, primary connections in copper, and secondary in PVC.
- In equipped heat exchangers, full regulation, with control of the filtering pump. Double display (setpoint and current reading).
- Simple recirculating pump in the primary circuit is optional.

INSTALLATION

- In the technical facility nearby the boiler at the filtering system output (plan a by-pass).
- Single-phase electric power supply 230V
- In special cases: exchanger supplied from a geothermal or heat pump.
- The exchanger must be sized taking into account the heating needs of the pool, the specifications of the exchangers with primary at 45°C or 60°C (see specifications table) and the power of the geothermal. For correct operation of the geothermal we recommend installing a buffer tank as shown in the diagram below.

COMPETITION MATERIALS

ASTRALPOOL

S.R.Smith

COMPETITION POOL SYSTEMS

The movable bulkhead, Wall and floor technology developed by Fluidra multiplies a pool's possibilities, as it divides it into different spaces and makes different sizes, depths and possible uses. This increases the profitability of the available space and saves on the construction costs involved in building different aquatic facilities.

MOVABLE BULKHEAD

A **Movable Bulkhead** is a vertical underwater structure able to move lengthwise across a pool floor to form a physical barrier, to make the most of the space in a pool as it divides it into areas for different uses.

STANDARD MODEL
MEDITERRANEAN MODEL
SPLIT MODEL
Benefits:
Easily integrable solution
Fina Compliant
Quick installation
Added value for businesses
Easy to use
Durable
Low maintenance

MOVABLE WALL

The **Movable Wall** is install at a fixed point on the pool floor where the pool is divided into two parts. In rest position, when the wall is not in use, the wall is completely flat in a recess on the pool floor. In a newly built swimming pool, the wall are integrated in a structural recess, so that the wall is not visible in its resting position.
Benefits:
Easily integrable solution
Quick installation
Added value for businesses
Easy to use
Durable
Low maintenance

MOVABLE FLOOR

A **Movable Pool Floor** makes possible the use of a single swimming pool to stage several activities at the same time that require various depths of water. The system is based on a mobile platform submerged in the water that changes the height of the pool shell, which enables a number of areas of varying depths to be created according to needs. In addition, the movable pool floor can be used to partially or totally cover a pool, which means greater energy savings and safety.

Benefits:
Easily integrable solution
Quick installation
Added value for businesses
Easy to use
Durable
Hygienic
Reliable
Low maintenance

SPARGER - Safety on diving boards

ASTRALPOOL

When diving off a diving board, the undisturbed water forms a fairly resistant surface, which if combined with a bad descent can result in serious injury on impact.

AstralPool has added **Sparger technology** to its pools in the shape of a new safety system for diving pools. Air is released at high pressure from the pool floor, which forms a large amount of bubbles when it mixes with the water to form a cushion for divers. This reduces the risk of injury and divers are more confident when they dive into the water, whether they are beginners or professionals.

NEW 2023

VELOCITY ADVANTAGE Starting block

SR Smith | **NEW 2023**

Velocity Advantage starting blocks feature strong fiberglass footboards with track start wedge on an HDPE composite base, particularly suitable for bulkheads.

• The marine grade HDPE composite base easily mounts to pool decks or bulkheads with minimal drilling.
• 41cm height makes it well suited for bulkheads and end walls with 20 cm to 42 cm deck to water heights.
• The 71cm x 81cm footboard surface is available with TrueTread® or sand tread.
• Track start wedge, adjustable to 5 positions, easily tucks under the footboard.
• Three built in backstroke handholds – two center positions and one on each side.
• Colorado & Daktronics timing system compatible.
• Custom colors and logos available on sand tread footboards.
• Meets FINA, NCAA, NFSHSA*, USMS and USAS competition pool rules and regulations.

TrueTread available colors:
GRAY   BLUE   RED   YELLOW

TRUETREAD

Sand Tread available colors:

- White, Red, Blue, Green and Yellow.
- Personalize the foot board with your logo. Logo can be only be applied to white Sand Tread.

BACKSTROKE START TRAINING device

S.R.Smith

NEW 2023

• Anti-slip backstroke ledge with raised diamond pattern.
• Two 5-foot polyester straps with stainless steel cam buckle to secure and adjust height.
• Works with a wide variety of starting platforms.

	Code	Standard Pack	Standard weight in kg	Standard volume in m³
Backstroke start training device	03-650T	1	1.4	-
BACKSTROKE START SYSTEM

Designed to help make backstroke starts faster and reduce the chance for slipping, the Backstroke Start System provides the option to easily add this capability to virtually any pool deck or starting platform configuration..

• Anti-slip backstroke ledge with raised diamond pattern.
• Easily adjustable ledge height with one-handed operation from in or out of pool.
• Spool end marked with millimeter increments (-40, -20, 0, 20, 40).
• Durable HDPE frame to protect from harsh elements at either indoor or outdoor locations.
• Three unique mounting options to secure device to most deck and block configurations.
• Clear markings on spool to show height of ledge to water level for compliance.
• FINA 2.10 compliant for competition.

3 mounting options:

ANCHOR MOUNTING KIT

Plastic anchor with grounding bolt fastened with plastic-headed stainless steel thumb screws

BRACKET MOUNTING KIT

Vinyl-coated 1/4" thick stainless steel bracket with 10 foot long polyester strap and stainless steel cam buckle

SQUARE POST-MOUNTING KIT

BCN03 Lane rope storage basket

ASTRALPOOL △

A new trolley designed to transport and store the BCN03 Lane ropes after use in the swimming pool. The BCN03 lane rope storage basket is manufactured of AISI-316 Stainless Steel and includes a PVC bag for collecting excess water from the float lines. Due to the bag's bottom outlets, it is emptied in a controlled manner with no water spillage. The trolley has four castor wheels for maximum mobility. Two of these fitted with brakes. It can store a lane rope up to 50 m long (or 2 of 25) and can be used for all lane rope models.

WATER POLO GOAL

The water polo goal is lightweight, floating and very resistant. It is built entirely from aluminium and is oven-painted white.

Manufacturing and measurements in accordance with FINA international swimming federation standards.

- Floating: Polyurethane foam-filled aluminium floats.
- Goal frame: 80 x 50mm aluminium tube
- Net fastening: 6 mm stainless steel round rod.
- Net side pipe: 23 mm stainless steel round pipe with fastening in frame and float.
- Fastening for goal lines.
- Nets included.

Complies with Fina Standards

SAUNAS

+ Source of health and well-being.

+ In addition to their spiritual side, saunas have been used for medicinal purposes for thousands of years.

+ Our ancestors sensed their therapeutic benefits and modern science confirms them.

+ A sauna is an excellent way to improve the blood and motor system, reduce muscle pain, and increase joint movement. It is also a good partner for our skin, leaving it bright and beautiful.

+ A sauna is the answer. Having a sauna boosts vitality and energy, helping us stay healthy.

+ More saunas, more health and well being.
ESSENTIA

OUTDOOR

ASTRALPOOL

+ Beautiful design.
+ Wood of great quality.
+ Perfect detail.

The equipment of the room contains:

- Construction of fir wood.
- Inside covering White Pine /Thermo Aspen verticalal panels 90x15mm.
- Floor grill made of Abachi 90x23mm.
- Two open Benches / two levels on one side/ with wall backrests, made of Abachi.
- Tempered glass 2x8mm on both sides of the door.
- Full glass sauna door in wooden frame(one and the same with door of Casetta).
- Sauna Led light below benches, warm white.
- Heater HARVIA Vega with outdoor touch control.
- Air ventilation.

Wooden Outdoor Casetta

- 10cm wall and ceiling with Thermo Pine /Thermo Aspen outside, thermal isolation and hardboard inside.
- Full glass door in wooden frame (one and the same with door of sauna).
- Roof sloped with min. 10% inclination.
- Bitum isolation on roof (to be installed on place).
- Full glass package on both sides of the door.
- The Casetta should withstand the weight of 200 kg/m².

STEAM BATHS

+ Straight lines, refined and elegant design.

+ AstralPool's steam rooms offer exclusive designs adapted to the most advanced technology on the market. The use of prefabricated modules remove on-site construction issues and speeds up construction times. Capable of withstanding the extreme humidity and temperature produced by the steam generator.

+ AstralPool's steam rooms are a complete solution that includes all the elements of a wet sauna (structure, framing, lighting, glazing, steam unit, finishes, etc.), manufactured according to our standard models or tailored to the needs of each project.

ICE CABINS

SUTRA

ASTRALPOOL △

+ Straight lines, sober and elegant design. AstralPool ice cabins provide the necessary temperature contrast in a wellness circuit following the aesthetics of your steam bath lines.

- Wall modules: Manufactured with double high density expanded polystyrene panel on an anodized aluminum structure.
- Water sprayed compacted ice wall, made with gas cooling coil system on an aluminium structure.
- Benches coated with large format porcelain in Kairos (Group 3).
- Walls coated with solid surface.
- Ceiling Ice Fountain and ice sink included in SUTRA.
- Ceiling: Vaulted ceiling made in white methacrylate modules of 3 mm, standing on anodized aluminium support, and tighten up with multicoated layers of polyester resin.
- Perimetral strip light under benches.
- Lower and upper ring: Anodized aluminum.
- Handle: Tubular stainless steel matt black.
- Frontal finishing: laminated glass (5+5) of 10Mmm.
- Door: Made of tempered glass of 8 mm, hinges of anodized aluminium matt black. Width 90 cm*
- Water consumption: max 2100 l (1 time).
- Wall thickness (cm): 6 - 10.

*Can vary according to customised design.

WATER

ASTRALPOOL

EMOTIONAL SHOWERS

+ **Hydrotherapy helps treat the most diverse illnesses, practically any ailment you can imagine, using pressure exerted on the body, simple showers or ones that use certain products, the top-down effect of jets, and localized therapy that stimulates the metabolism, nervous system, and blood flow by either holistically treating the body or with a more targeted solution using water with contrasting temperatures.**

+ **AstralPool's range of treatment showers features top-of-the-line parts. Designed for professional use, they are low-maintenance, easy to install, and equipped for long-term use.**

EMOTIONAL SHOWERS

The emotional showers and tunnels combines fully programmed water, light, and temperature effects. The perfect fit for designs that incorporate water and moods created by lights, sounds, and fragrances.
TYPES OF JETS

ASTRALPOOL

	RAIN Delicate on the skin, the rain jet tickles it causing a pleasant, stimulating and relaxing sensation.		**NEBULIZED** The nebulized jet slips in the environment, wrapping the body in a cosy and regenerating cloud of water.		**TROPICAL** A constant and powerful jet, with an embracing and revitalizing effect, massaging the body and recharging its energy.
	WATERFALL The powerful gesture of the waterfall absorbs us and, through the skin contact, communicates its energizing force to the whole body.		**AERATED** Water and air mix and enhance each other, massaging the body and inducing creativity and dynamism.		**ATOMIZED** By reducing the water into tiny particles, the atomized jet gives a refreshing and relaxing feeling of wellbeing.
	TROPICAL AERATED The mix between tropical and aerated jets creates the effect of a dense rain which, descending, relieves and reduces muscular tension.		**LED + NEBULIZED** A mixture of different therapies and effects, the LED light optimizes and enriches the regenerating effects of nebulization.		**LED + ATOMIZED** The fusion of water particles and LED light heat enhances and intensifies the delicate touch of the atomized jet.

HORIZONTAL SHOWER

ASTRALPOOL
Horizontal shower and massage, in mirror-finish stainless steel, for mounting on the ceiling, with electronic water mixer, chromotherapy and touch control panel to manage 4 pre-configured programs (sport, energy, relaxation, balance) or manual start.

Hydraulic characteristics:

• Water supply works with hot and cold water.
• Pressure 2 ÷ 5 bar.
• Recommended pressure 3 bar.
• For pressures higher than 5 bar, we suggest installing a pressure reducer.
• Cold water temperature 10 ° ÷ 15 ° C
• Hot water temperature 55 ° ÷ 65 ° C
• Optimum hot water flow 15 l / m.

NB:

• A drainage of water in the ground is necessary to release the flow of water.
• It is suggested to install a water softener for water with hardness higher than 15/18 degrees F°

Electrical characteristics:

• Electrical supply 100-240V - 50 ÷ 60Hz
• 12V operation control panel.
• Maximum absorption 100W
• We suggest installing a dedicated RCCB.

MINI CONTRAST POOLS

+ In the late 5 th century B.C., following the example of the Greeks, the popular Roman baths incorporated cold rooms called "Frigidariums", where bathers would finish their circuit after passing through hot rooms like the steam room or the hot pool.

+ We preserve these rituals of old, fully confident in the health benefits that contrast therapy has on the body.

+ Not only is it good for the skin, but it also increases metabolism, blood flow, and stimulates the widening and narrowing of the blood vessels.

MINI CONTRAST POOLS

The mini contrast pools has health benefits for the body, not only is it good for the skin, but it also increases metabolism, blood flow, and stimulates the widening and narrowing of the blood vessels. Up to 2 minutes of use recommended.

MASSAGE NOZZLES

ASTRALPOOL
Set comprising three massage effect nozzles, using a combination of water and air to stimulate calves, thighs and hips. These are hung in a vertical arrangement on the wall of the pool, at a height of 30, 60 and 90 cm from the pool bottom. The set is completed with a polished rounded stainless steel handrail which can either be attached to the pool surround or the wall of the pool itself. This handrail serves two functions -it gives pool users something to hold onto whilst allowing air to enter through holes situated along its length which is then directed to the nozzle by the so-called Venturi effect.

HYDRO LEISURE ELEMENTS

AIR BLOWERS

ASTRALPOOL

Air pump designed for spas, baths, hydromassage installations and similar which produces a constant stream of air bubbles at medium and high air volume levels. It can also be used to stir up the filter bed, for example in back wash cycles where a low intensity air current is required.
Code	Pump Power	Flow	Pressure	Voltage
35387-FG	0.75 kW 3 phase	144	190	110 / 220 V

WATER EFFECT TIMER

ASTRALPOOL △
- Voltage: 220 V AC - 50 Hz.
- Maximum relay current: – 50 Hz 12 A.
- Contact type NC/NA.
- LED voltage outlet: red and green, independently.
- Timer dimensions 52 x 90 x 80 mm
- Times available: 1,2,3,4,5,6,7,8,10,12,15,20,25 and 30 minutes.
- LED indications:
- LEDs off = no voltage.
- Permanent green LED: relay circuit activated.
- Permanent red LED: relay circuit deactivated.
- Flashing green LED: 10 seconds to shut off.

Regulations:

- Directive 2014/35/EU, on electrical equipment designed for use within certain voltage limits
- Directive 2014/30/EU, on electromagnetic compatibility
- Directive 2011/65/EU, on the restriction of the use of certain hazardous substances in electrical and electronic equipment
- Directive 2009/125/EC on the framework for setting ecodesign requirements for energy-related products.

	Code
Water effect timer	35403
SPA RANGE

+ **Sit back, relax, and enjoy…**

+ **Water has also been essential for human survival, and the benefits of hydrotherapy have been known since ancient times.**

+ **Today, hydrotherapy is a natural solution used to alleviate and treat conditions including stress, anxiety, and insomnia, symptoms of our hectic lives.**

+ **Hydrotherapy helps stimulate blood circulation and eliminate toxins from the body and is an excellent tool for treating a range of diseases, as well as bone and muscle injuries.**
PROFESSIONAL RANGE

ASTRALPOOL △

Commercial spas with overflow channel and compact units

+ **Spas designed for commercial spaces, gyms, wellness centres, hotels…**
+ **A wide range of options and finishes that cover all needs.**
+ **Spas with both an acrylic and mosaic tile finish.**

COLOUR CHART FOR SPAS

N° 44 WHITE	N° 46 BLUE MARBLE	N° 59 STERLING	N° 64 PEARL SHADOW	N° 65 ALBA	N° 27 SILVER
OPTIONAL EQUIPMENT

CHROMOTHERAPY LED SPOTLIGHT,

for public spas only

The Mini LED spotlight is the best option for lighting public spas. Thanks to the high intensity LEDs, lighting is similar to that attained with conventional lamps.

The range of LumiPlus Mini 2.0 projectors has a multitude of possible colour combinations and sequences with higher light intensity and better energy efficiency, which result in an 80% saving on electricity consumption compared with conventional projectors, as well as 100,000 hours of useful life time without the need for maintenance.

STAINLESS STEEL BATH

ASTRAL**POOL**

AstralPool Nordic bath offers a unique filtration and treatment technology for Nordic baths to guarantee bacteria-free water.

• Ultra fine 1 micron filtration captures 100% of particles.
• The 18 m³/h pump have a 6 minutes turnover.
• High radiation UV and Ozone treatments kill bacteria and disinfect the water.
• OZONE CHOC® treatment cleans biofilms and eliminates bacteria (international patent EP2785648).
• The measurement and management of water quality are managed by an integrated computer (ORP reader, pH, T° C).

COATED RELAX LOUNGERS

CLASSIC LOUNGER

ASTRALPOOL △
The Classic model with a Cleopatra-style base and square footrest is available in both heated (design with electric cover) and unheated solutions. This model also offers the option of straight or rounded base corners.

The Lounger kit assembly contains:
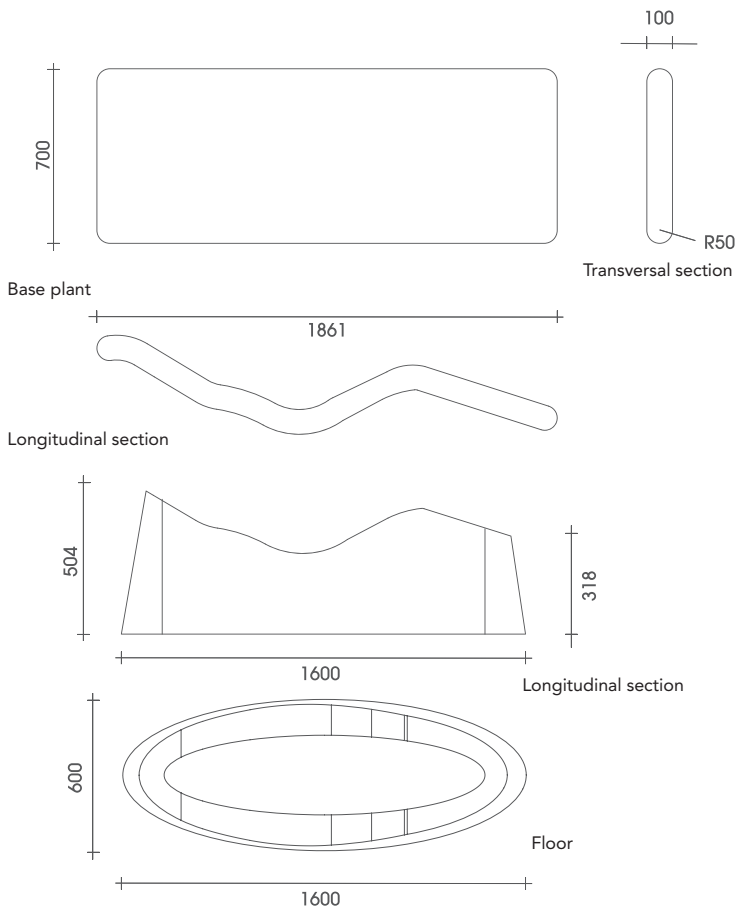

• Top of the lounger.
• Base of the lounger.
• Installation auxiliary material: Adhesive fiberglass tape 10 cm x 45 m (1 unit), mortar joint treatment MJ-73 5 kg (1 un.), and AR-99 Reactive Adhesive 6 kg (1 un.)

Area to be tiled:

• Lounger base with Straight/Rounded edges: 1.5 m²
• Lounger (top component): 2.5 m² (the area just above the base that cannot be seen does not need tiling)

Technical specifications:

• Core: high density rigid expanded polystyrene core
• (EPS), CFC and HCFC free and fire retardant additive incorporated, in accordance with EN 13163.
• Lounger installation kit included

DESTINATION LOUNGER

SR Smith

NEW 2023

The Destination Lounger lets you relax and enjoy the pool without a splash. Elegant design and sturdy construction combine to give pool owners the opportunity to upgrade their sun shelf space with ease. Made using an advanced RTM manufacturing process, Destination Loungers are lightweight yet strong. The innovative design allows pool owners to easily fill the base section with water but, more importantly, also allows them to move the lounger to remove water so it's easy to take it off the sun shelf when not in use.

• Perfect for commercial use
• For use on a pool ledge with water depths up to 30 cm
• High-quality RTM composite material
• UV protection to resist fading
• Compatible with all pool types, including vinyl
• Exclusive colors and visual textures
• Easy to drain and remove when not in use
4 colors available:
| Solid Gray | Solid Tan | Starry Night | Seashell |

	Code
Destination Lounger – Solid Tan	DS-1-51
Destination Lounger – Solid Gray	DS-1-52
Destination Lounger – Starry Night	DS-1-60

HALOTHERAPY SYSTEMS

HIMALAYA CUBE

ASTRALPOOL

+ **Portable salt spray made from natural Himalayan salt bricks, backlit with LED light.**
+ **Himalaya Cube creates unique and relaxing moods, blending elements like aroma, music, and color with halotherapy.**

Included elements:

• Pannel control with LED screen.
• Hours schedule programming.
• Aroma diffuser.
• Button for selection.
• Electronic control of temperature.
• Integrated MP3 player with SD electronic card. Synchronisation with chromotherapy.
• High power LED chromotherapy.
• Chromotherapy synchronisation with ISO equipment.
• Packaging.

Optionals

• 90118 Air extractor.

SALT WALL

AstralPOOL △

+ As simple as relaxing and breathing inside a room with salt particles in the air.

+ AstralPool's salt walls are made of blocks of Himalayan salt and built on a transparent methacrylate panel.

+ Exceptionally easy to install and maintain. These walls include LED backlighting. Combine it with the Himalaya Cube.

Included elements:

• Mineral salt brick from Asia 200 x 100 x 25.
• Transparent laminated glass 5 + 5.
• LED lighting with profile and diffuser.
• 12V power supply.

	Code

FLUIDRA

ASTRALPOOL

Astana Expo 2017

WATER IS THE ORIGIN OF EVERYTHING THAT EXISTS.

IT IS THE ESSENTIAL ELEMENT.

(Tales de Mileto)

———

Fountains have always been synonymous with life. Playing a vital role as a source of happiness, a place where communities gather, a vibrant and dynamic space, a meeting point and a metaphor for life.

Natural and artificial, decorative and functional. Today we can enjoy fountains as a more decorative, sustainable, participatory and spectacular event.

Fluidra has extensive experience with more than 40 years creating a wide range of different innovative and sustainable fountain solutions through its own products and engineering technologies: dry-deck fountains, watershows, cascades, vessel fountains, water curtains, etc.

Each fountain is practically handcrafted, as every detail matters. With a custom-client approach, from the conceptualization and design we conceive **refreshing spaces that add an ornamental touch to any aquatic project as well as a great added value**.

SPEAR NOZZLE

ASTRALPOOL △

Spear Nozzle is the most polyvalent nozzle for the design of any ornamental fountain.

They are made of AISI 304 stainless steel, which provides high sturdiness and rusting resistance, and provides a stylish finish to the fountain.

It has an 20° adjustable joint to correct the jet outlet in case of misalignment of manifolds or pipes, or to create parabolas without additional accessories.

FOAMY NOZZLE

ASTRALPOOL

Foamy Nozzle produces a very sparkling and consistent jet. The ornamental effect doesn't depend on the water level and it's very wind resistant, generating a great uniformity on the fountain.

Furthermore, it contributes to an oxygen enrichment of the water.

They are made entirely of AISI 316 stainless steel, which provides high sturdiness and oxidation resistance, and provides a stylish finish at the fountain.

DANCER JET

Rhythmic and elegant movements combined with the swing of the water provided by the Dancer jet contribute to create new sensations and dynamism just by the movement of the water.

The combination of light and water effects makes it innovative and spectacular, and without a doubt, it delivers the effects intended for the enjoyment of spectators.

The Dancer jet follows any kind of rhythm thanks to its axial movement.

The infinite number of sequences of this jet means that extremely spectacular shows can be put on.

SWING DANCER JET

ASTRALPOOL △

The Swing Dancer jet effect provides a show of light, color and graceful movements that express feelings and emotions transmitted through the magical combination of water and light, all of which creates the impression of a ballet staged on the water.

The multidirectional spout generates unique movements that create numerous shapes and figures. The jet can be programmed to go faster or slower so that it appears to dance on the water in dynamic, elegant movements.

DIGITAL CURTAIN

ASTRALPOOL
Historically, murals have been a way of representing all kind of elements. Through a combination of water and light, these representations will be given a new meaning in an innovative and interactive way.

The effect introduces new technologies able to represent shapes instantly by interacting with a tablet device. A multitude of geometric combinations, organic figures and texts have their place within the concept of an interactive curtain, where you can draw and create anything you want using water and light.

Due to the force of gravity, it is important to highlight that the recommended height is lower than 4 meters. The Digital Curtain is perfect for advertising.

Nominal Voltage [V]	230 VAC
Light type	RGB+W - DMX
Light power consumption [W/m]	52
Total power consumption [W/m]	240 (without pump)
Power rating[A]	1.1
Recommended pressure [bar]	0.5
Curtain flow [(m³/h)/m]	4
Recommended height[m]	≤ 4
Control system	Watercurtain Manager Software
Material	AISI 316 / Brass / Others
Weight without water [kg/m]	58 kg/m
Weight with water [kg/m]	73 kg/m
Protection class	IP 66

WATER CURTAIN

ASTRALPOOL △

* Product Upon Request

This ornamental effect creates a large screen of water that serves as a perfect surface on which to project videos and other images. The Water Curtain is big enough to project a standard panoramic HDTV image (16:9).

The combination of this decorative feature with a video or laser projector will create a visually impressive effect.

	Code
Water Curtain	66551
TECHNICAL FEATURES	
Dimensions (L x W x H) [mm]	1000 x 140 x 114 (standard)
Recommended pressure [bar]	0.5
Curtain flow per m [m³/h]	4
Recommended height [m]	≤ 4
Material	AISI 316 stainless steel/Brass
Weight without water [kg/m]	15 kg/m
Weight with water [kg/m]	20 kg/m

WATER CURTAIN WITH LINEAR LED

ASTRALPOOL △

This ornamental effect creates a large screen of water that serves as a perfect surface on which to project videos and other images.
It incorporates RGB+W LED lighting with individual control of four LED lights each meter of water curtain, through DMX protocol.

The combination of the waterfall with integrated lighting will create a visually impressive effect.

	Code
Water Curtain With Linear Led	73346

TECHNICAL FEATURES	
Dimensions (L x W x H) [mm]	1042 x 164 x 114 (standard)
Nominal Voltage [V]	24 VDC
Light type	RGB+W - DMX
Power consumption [W/m]	52
Recommended pressure [bar]	0.5
Curtain flow per m [m³/h]	4
Recommended height [m]	≤ 4
Material	AISI 316 stainless steel/Brass
Weight without water [kg/m]	18 kg/m
Weight with water [kg/m]	23 kg/m

JETS

MESH CURTAIN

ASTRALPOOL △ | NEW 2023

This mesh waterfall creates a continuous effect of falling water, producing a soft sound of calm and tranquility. It generates a pleasant and attractive hypnotic effect that recreates small waves of water.

With its state-of-the-art design it produces a perfect and uniform sheet of water continuously, silently and without splashing throughout the entire mesh. It is an ideal ornamental solution for interior spaces in hotels, shopping centers and events due to its great appeal and integration with the environment

It is made of AISI 316 stainless steel to guarantee maximum resistance to rust and reproduce a high-quality finish. The ornamental effect can be maximized by adding a lighting system or digital projection.

TECHNICAL FEATURES

PRODUCTS

WATERFALL

ASTRALPOOL △

This ornamental feature produces a continuous waterfall. As a result, it makes the gentle, calming sound of the waves on the beach. It can be installed both indoors and outdoors.

Its cutting-edge design creates a perfectly uniform film of water along the whole cascade.
It is made of AISI 316 stainless steel to ensure maximum resistance to rust and to give it a high quality finish.

It is possible to enhance the ornamental effect by adding a lighting system.

JET COSMOS

ASTRALPOOL △
Cosmos produces a sequence of perfect spherical water droplets that float in the air and shoots the water up and down. These movements emulate cosmic water particles that act randomly.

The illumination emphasizes the effect by producing a random display of different colored particles.

Cosmos can alternate the droplets with another astonishing effect: small, extremely fast vertical jets able to create high-speed cascades, waves, etc.

GLASSY JET

AstralPOOL

Crystalline laminar nozzle that does not spill a single drop of water. From start to finish, a perfect parabolic path is followed that is created on the basis of the laws of fluid dynamics.

The Glassy jet shines light in the water as it follows its path. It only illuminates the water and does not cause any light pollution.

There is also the Jumping effect option, which throws small streams of water across the parabolic path.

SWITCH S SYSTEM

ASTRAL*POOL*

Switch System is a dynamic jet ideal for interactive fountains such as Funsquare type, to produce fast water games with individual control for each installed jet.

The design of this jet allows state changes without water hammer in the installation.

It has many tile models being able to choose between different types of round and square designs.

FIRE JET

ASTRALPOOL △

The stylized, tall and controlled Fire jet produces an eye-catching effect, not commonly seen, let alone in a fountain! Fire has always been an larger-than-life feature that emanates power and strength, and in a fountain display, it adds the cherry on the cake.

Water and fire, two opposite elements that marry perfectly when a magic show is put on; an explosive combination and the most impressive you could ever imagine.

The hard work done has led to a new concept: a variety of colors for the fire jets: blue, yellow, green…

The flames do not smell or produce smoke because the system does not run on gas or fuel oil. The fluid that creates smokeless flames is readily available everywhere.

ROCKET JET

ASTRALPOOL

The Rocket jet gives the effect of an explosion of water from the ground that rises up in a split second to above the height of really tall buildings as it can reach heights of up to 50 meters.

The explosion of water creates a perfect vertical line that will be the centre of attention anywhere.

The lighting highlights the height of the water to turn it into a powerful beam of light, which rises at high speeds and draws colored lines on the water.

The combination of several units of this effect will create spectacular high speed sequences.

PLUG & PLAY

ASTRAL POOL

The Plug and Play fountain kit let you have a small complete fountain into your garden.
It combines comfort, design and energy efficiency in a easy and quick product to install.
It comes with 10 meter cable, a nozzle and a multi color RGB light included. The nozzle can be replaced by any other nozzle of our plug and play series to configure the fountain to your preference.
The highly efficient RGB LED with color changing sequence brings color into the pond.
The jet height is adjustable up to 3.5 meters, according to the installed nozzle.

SUBMERSIBLE PUMP DF

ASTRALPOOL △

Submersible DF pumps has a prefilter incorporated which helps to the correct working of the device It has a large filter surface, so increases highly filter clogging time.

Incorporates supports to ease horizontal pump installation.

There are available some pump models according to the needs of each installation.

It is a very robust and resistant to rusting model manufactured in AISI 304 stainless steel.

By downloading the OnLED App onto your smartphone or tablet (using an Android or iOS system), you will be able to control your OnLED lamps and projectors.

• DMX stand alone controller.
• Compatible with any DMX fixture or DMX LED driver.
• Ready-to-use (pre-loaded with 8 scenes and 170 RGB fixtures).
• Sleek, black glass design which sits 11mm from the wall.
• Color palette (can also be used for scene selection).
• 12 touch-sensitive buttons. No mechanical parts.
• Touch-sensitive wheel allows for accurate color selection.
• Built-in flash memory for storing programs.
• Up to 36 dynamic or static scenes.
• 1024 DMX channels. Control 340 RGB fixtures.
• Clock and calendar with Sunrise/Sunset triggering.
• Wi-Fi network communication. Control lighting remotely.
• USB connectivity for programming and control.
• 8 dry contact trigger ports.
• OEM customization of the color palette and logo.
• Windows/Mac software to set dynamic colors/effects.

Output protocol	DMX512 (x2)
Programmability	PC, Mac
Available Colors	Black
Connections	USB, 8 dry contact ports, open drain ouput (for relay)
Memory	In-built flash
Temperature Battery	-10ºC - 45ºC LIR2032
Mounting	Single or double-gang wall socket
Dimensions	146 x 106 x 11 mm
Weight	200g
Standards	EC, EMC, ROHS

ONDMX TOUCHSCREEN PRO

ASTRALPOOL △

The feature rich lighting controller has been designed to provide a control solution for the most demanding of projects, whilst maintaining an easy to use panel of touch sensitive buttons. The controller integrates a graphical color screen allowing scene photos to be displayed. Easily view the selected zone, scene name and design without the need to navigate through complex menus. Change the speed, color and dimmer using the circular palette.

The lighting levels, color and effects can be programmed from a PC, Mac, Android, iPad or iPhone using the included software..

- Sleek glass design which sits 11mm from the wall
- Graphical color display to show selected environment
- Color/dimmer/speed palette
- Color temperature mixing
- Touch sensitive buttons. No mechanical parts
- Touch sensitive wheel allows for accurate color selection
- Multi-zone microSD memory
- Multi-room control with 500 scenes, 10 zones
- 1024 DMX channels. Control 340 RGB fixtures
- USB & Ethernet connectivity for programming and control
- RS232, Dry Contact Ports and an Infra Red input port
- Clock and calendar with Sunrise/Sunset triggering
- Network communication. Control lighting remotely
- Catalog of designs including black and white glass
- OEM customization of the color palette and logo
- Windows/Mac software to set dynamic colors/effects
- iPhone/iPad/Android remote and programming apps

	Code
OnDMX Touchscreen Pro	I0906

POWER SUPPLY

ASTRALPOOL △

Power supply by LED technology products, especially designed for use in aquatic installations like pools or fountains.

	Code
Power supply 24VDC 120W	I0898
Power supply 24VDC 240W	I0899
Power supply 24VDC 480W	I0847
Power supply 24VDC 960W	I0908

SAFETY TRANSFORMERS

ASTRALPOOL △

Single-phase Safety Transformers, especially designed for use in aquatic installations like pools or fountains. With the protection degree IP20 or more, primary of 230V AC and secondary of 12-13-14V AC.

|	Code
Safety transformer IP20 350 VA	I0820
Safety transformer IP20 130 VA	I0821
Safety transformer IP65 350 VA	I0822
Safety transformer IP20 700 VA	I0823

BASIC ONLED

Electric diagram that is obtained through a Pushbutton (n/c) + Safety transformer. The size of the transformer depends on the number of spotlights that are installed and their consumption. For example, if it has to power 5 24W spotlights, the transformer should be 125W. An input of 12V AC must reach the lamp. With every click, it changes colour or program, offers a range of 7 colours, as well as 7 colour changing programs.

TOTAL ONLED

El Outline based on the OnLED Modulator, for increasing the number of colours and sequences of the spotlights. With it, it is possible to turn the spotlight on and off, change 12 colours and 8 sequences and control the speed of the sequences and the power off timer. The Modulator also has an antennae with that can reach up to 50m. with which it can be synchronized with the OnLED Remote Control (I0828I52). The Modulator should be installed before the safety transformer and is connected to VAC through two terminals indicated as RED and is connected to the transformer primary through two terminals indicated with TRF. It is recommended to install the Modulator ensuring it is protected from corrosive environments.
ON DMX

Those that want total control of the lighting can use the spotlights with DMX adaptation and OnDMX Control, and then they can independently control all the spotlights, and obtain more than 16.000.000 colours and infinite sequences. Each driver handles 27 DMX channels.

V:NANO

ASTRAL**POOL**
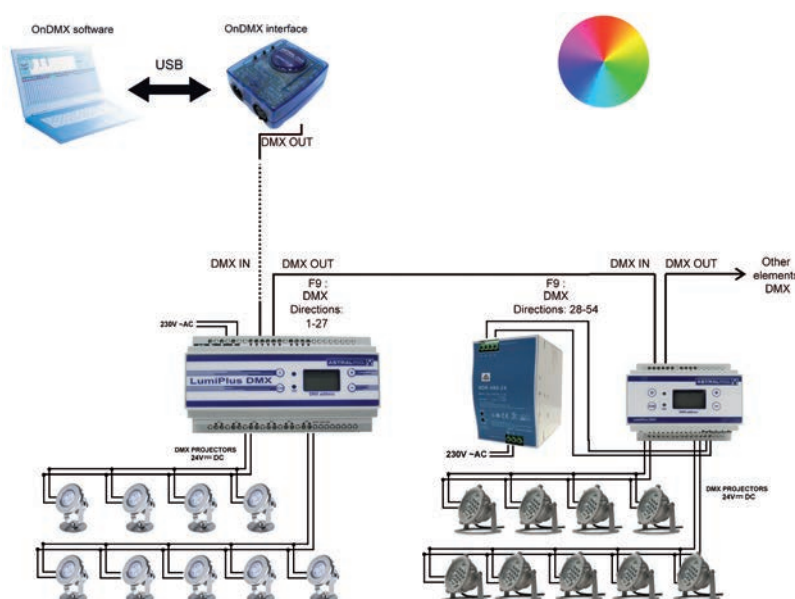

Made even for the roughest environments, the V:Nano represents Syncronorm's smart solution for smaller and more intimate fountain show installations. The V:Nano 512 or 1024 "music" show controller is a DIN-rail fan-less & ruggedized embedded system with a highly efficient low power CPU chipset.

The V:Nano can withstands wider temperature ranges while featuring DMX 512/1990 ports, an isolated Ethernet port with 10/100 Mbit, a micro SD card slot and a 2x16 LCD segment-display.

A perfect match for smaller stand-alone fountains as well as musical fountain installations, both feature 8xdigital I/O's.

The V:Nano is fully compatible with our fountain control system Depence. Easily enhance your workflow by uploading shows via SD card or your local network.

Key Features:

• DIN-Rail Mounting
• Scheduler
• Full RDM Support
• Sensor Connectivity
• Remote Control
• V:Nano Scripting
• SD-Card Memory
• Music Playback

V:SERVER3 TOUCH

ASTRALPOOL

Next to Depence², our brand-new software system, we also have redesigned our top-level standalone show controller, the V:Server.

Alongside a new 19 inch rack aluminium case it now features a touch screen interface on the front-panel next to a multicolor LED Logo.

The V:Sever3-Touch also comes with integrated optical isolated digital and analog I/Os to directly connect sensors and triggers.

The new node-based logic system of Depence² offers you maximum flexibility for any kind of interactive installation. Pre-existing Depence projects are still fully compatible as well.
The V:Server3-Touch will support projects created in former versions of Depence further on. With high performance and most stable connectivity, the V:Server still remains the perfect choice for running multimedia shows, while offering full ArtNet & RDM support as well as timecode features, and much more.

Key Features:

- BMI – Logic Automation
- Scheduler
- Touch-optimized HMI/Live Panel
- Timecode I/O
- DMX-RDM Support
- ArtNET RDM Support
- Sensor Connectivity
- Remote Access
- Music Playback

LEVEL CONTROL SYSTEM

ASTRALPOOL △

This control system provides a complete solution for controlling the water level in any fountain. This system makes it possible to fill a fountain automatically and acts as a security system for pumps if a fountain's water level drops too low.

The level control sensor is a very robust model that is resistant to oxidation and made entirely of AISI 316 stainless steel.

In the case of the Level Control Sensor Adjustable, the costumer receives the product with an standard and equal length on all rods, in order that the costumer adjusts this length according to the installation.

	Code

WIND CONTROL SYSTEM

ASTRALPOOL △

This wind control system is the best way of avoiding water loss from jets, thus preventing the area around a fountain and the spectators of a fountain display from getting wet due to the action of the wind.

It can be run in three modes depending on wind speed: normal, reduced fountain jet height and off in case of very strong wind.

	Code

SWIVEL

ASTRALPOOL

The swivel is a perfect adapter for all types of nozzles. Corrects the unevenness produced during the development of the work. The swivel also allows positioning any type of nozzle in any desired angle.

It is entirely made of AISI-316 stainless steel, which provides high sturdiness and oxidation resistance, and provides a stylish finish at the fountain.

PRESSURE HOLDING VALVE

ASTRALPOOL
Pressure holding valve to install in manifolds with several controlled outputs. With this valve it is possible to maintain the pressure in the manifold, regardless of the open outputs.

With this valve is also possible to protect the pump against overload and the line of excessive pressures, in addition of ensuring a minimum flow.

It is a very robust and resistant to rusting model manufactured entirely in AISI 316 stainless steel.

LAGOONS

FLUIDRA

ASTRALPOOL

Laguna Martianez. Puerto de la Cruz, Tenerife (Spain).

INNOVATIVE LAGOON & LAKE SOLUTIONS AT THE HEART OF YOUR TOURISM, RESIDENTIAL OR REAL ESTATE PROJECT

A lagoon - a man made recreation of an idyllic coastal paradise is an innovative solution that is setting a trend in the hotel, private and real estate industries.

These oases can be adapted to limitless shapes and sizes thanks to Fluidra's sustainable technology.

These well defined spaces are an extremely versatile solution that make it possible to include multiple concepts in a single design.

They are able to accommodate a wide range of activities, including water sports like swimming, kayaking, paddle surfing, even sailing in small boats, as well as a host of **recreational activities that make this unique concept perfect for all types of users**.

ASTRALPOOL®

LAGOONS   625

LAGOONS

ASTRALPOOL
WHAT IS CONSIDERED A LAKE AND A LAGOON

A lagoon is an artificial recreation of a paradisiacal beach mainly used in hotels, resorts and real estate, among others These multifunctional spaces are an extremely versatile solution that make it possible to include a wide range of concepts, areas, themes and services.

They are able to accommodate a wide range of activities, including water sports like swimming, kayaking, paddle surfing, sailing, as well as a recreational activities that make this unique concept perfect for all family and users.

An artificial lake on the other hand, is a large body of water that provides a fresh, ornamental touch to outdoor areas It can also include some water shows or water activities such as boats for navigation but they can't be used for swimming and aquatic sports.

LAGOONS & LAKES

The customized and cutting-edge designs of our lagoons create a "pull" effect, generating an increase in demand that translates into more sales for the buisness and activities located directly on the lagoon. Likewise, lagoons increase the value of any property and deliver added value to developments.

MAXIMUM QUALITY

Focused on every project

As designers, manufacturers and suppliers, at Fluidra we ensure that the investment in our lagoons has a minimal impact on construction and maintenance costs.

Waterlight

Our lagoons are equipped with a double layer of protection that guarantees water tightness.

PRISTINE WATER

Lagoon treatment

Our lagoons are designed to adapt to the requirements of each project, and we offer both freshwater and saltwater solutions.

Treatment and desinfections consists essentially of:

- Filtration system.
- Recirculation system.
- Desinfection water treatment.
- Flocculation system.
- UV system.

Microbiological and physicochemical quality

Compliance with international health standards.
